Company Introduction

Madi Agriculture Dev. Co., Ltd was established at 2003 in China and locates in Zhangzhou City where is well known the one of the main production areas of horticultural industry in China. We are specialized in growing and exporting of plants as below:

sansevieria (superba,laurentii , hahnii, etc.), pachira , cactus, ficus microcarpa, cycas, succulent, Boungainvillea. etc.

Why us?

1 Good price

We export hundreds of containers with all plants per year to Europe, USA, Middle East etc.. With big export volume, we can save the cost as more as we can.

2 Excellent quality & Stable volume

We have our own bases cover more than600000 square meter which have been registed in CIQ and it can make sure the stable quality and sufficient volume.

3 Good technique support

Strong technical team has the good knowledge on the planting & can give good instruction when the goods arrive at the destination country.

4 Profession

With more than 10year export experience, we understand well how to cultivate/ pack /transport the plant and also how to reach the standard of the CIQ of destination port.

5 Our mission

Customer satisfaction is the most important. To help customer sell the product well in their market is our final market.

Warmly welcome to visit out nursery!
