

.....WE ARE HERE FOR YOU.....

Founded about 35 years ago in GEBZE, GENSA KİMYA SANAYİ VE TİCARET AŞ , later moved to new factory that was built on an area of 16,000 m² in BANDIRMA Organized Industrial Zone, in 2013 .

There are 4 active companies in Turkey and abroad inside the GENSA corporate group.

GENSA, the main company of the group, has always been a pioneer in its field.

For the past 35 years it has been the sole producer of ferro alloys powders for welding electrode companies in Turkey, the Middle East and Balkans. Also we are the only company in the world that we produce fluxes (Ready mixed powders) for welding electrode companies next to Ferro alloys powders.

We are also the first producers of double-glazing chemicals, sealants known as Thiokol, Butyl, Hotmelt and butyl-based materials in strings of various thickness and width called BUTYL BANT, in Turkey and Central Asia.

GENSA is still exporting its products to 31 different countries in the world, from the United States to Japan.

It has been amongst the 5 highest exporting firms in its field in the list of YILDIZ exporters of Istanbul Minerals and Metals Exporters' Association and ranked 2nd, 3rd, and 4th in exportation awards.

GENSA has held a TÜV, NORD CERT – DIN EN ISO 9001 certificate for 17 years. Its production is exclusively R&D-based. This is how it has created its own know-how and technologies.

In its new factory in Bandırma Organized Industrial Zone stabilized ferro alloys powders and double-glazing chemicals (Butyl, Hotmelt, and butyl-based BUTYL BANT in various thickness and width) are produced beyond European standards and quality due to their new improved formula.

We are still proud to introduce these products to the world.

We already export our products to the 87 companies in 31 countries .

We are also proud to contribute to our country by producing these high-tech products in Turkey. We congratulate all our producers who contribute to our country's economy. We have been pursuing our production for 35 years in our factory in GEBZE, and in BANDIRMA organized industrial zone since 2013.
