

COMPANY PROFILE

2023

KOLOĞLU HOLDING

Koloğlu Holding keeps getting stronger and growing while becoming diversified in different sectors each year. Established in 1976, our first company Kolsan was followed by Kolin Construction in 1977, and our journey that embarked in Elazığ has reached out around Türkiye, then getting beyond our boundaries. Our national and international achievements as well as our organizational skills have steered us to different fields of activity over time.

Today, we do our business with the awareness of our environmental and social responsibilities and have faith in sustainable development.

KOLARC

Kolarc Machine, established by Koloğlu Holding in 2017 with the aim of achieving firsts in Turkey in the field of power electronics, carries out the production of welding machines with quality and performance at international standards.

Welding machines produced with 100 percent domestic capital and national technology are exported to nearly 30 countries, especially in Europe. KOLARC, Ankara Chamber of Industry 2. With its new factory located in the Organized Industrial Zone, it has increased its production area and capacity by 4 times. With its digital communication infrastructure and fully compatible products with robots, KOLARC is the innovation leader in Turkey. In addition, by managing the processes at the highest efficiency with advanced arc welding programs, it provides cost reduction in a short time.

WHETHER IT'S MANUAL OR ROBOTIC, IT'S A WHOLE NEW EXPERIENCE

Digital, handy, smart.
With the new MX series, your welding experience changes completely. Smart build with excellent network connectivity. Handy in use. Incredibly powerful with current intensity from 220 A to 600 A. For best welding results, the MX Series has been completely renewed.

BEST CONTROLS FOR BEST TIG WELDING

The perfect welding starts with settings. With new controls of the TX Series, manual or robotic, you have all the possibilities for the highest level of personal settings.

CONTINUOUS ROOT WELDING WITH CELLULOSE ELECTRODES

The SX Series Has Everything That Makes MMA Welding Perfect.

SX

SAW

INVERTER SUBMERGED TECHNOLOGY 100% PRODUCTIVITY, QUALITY AND SATISFACTION

100% Penetration with CV, CC and CV + CC arc control technology.

ROBOTIC WELDING

Spatter-free steel welding

With Pulse technology you can obtain high quality welding outputs without needing a transition arc that is difficult to control and causes burrs. At the same time, it eliminates spatter and perform cleaning after welding with its smart welding solutions.

5 REASONS TO CHOOSE US

1

OUR VALUE-CREATING WELDING TECHNOLOGIES

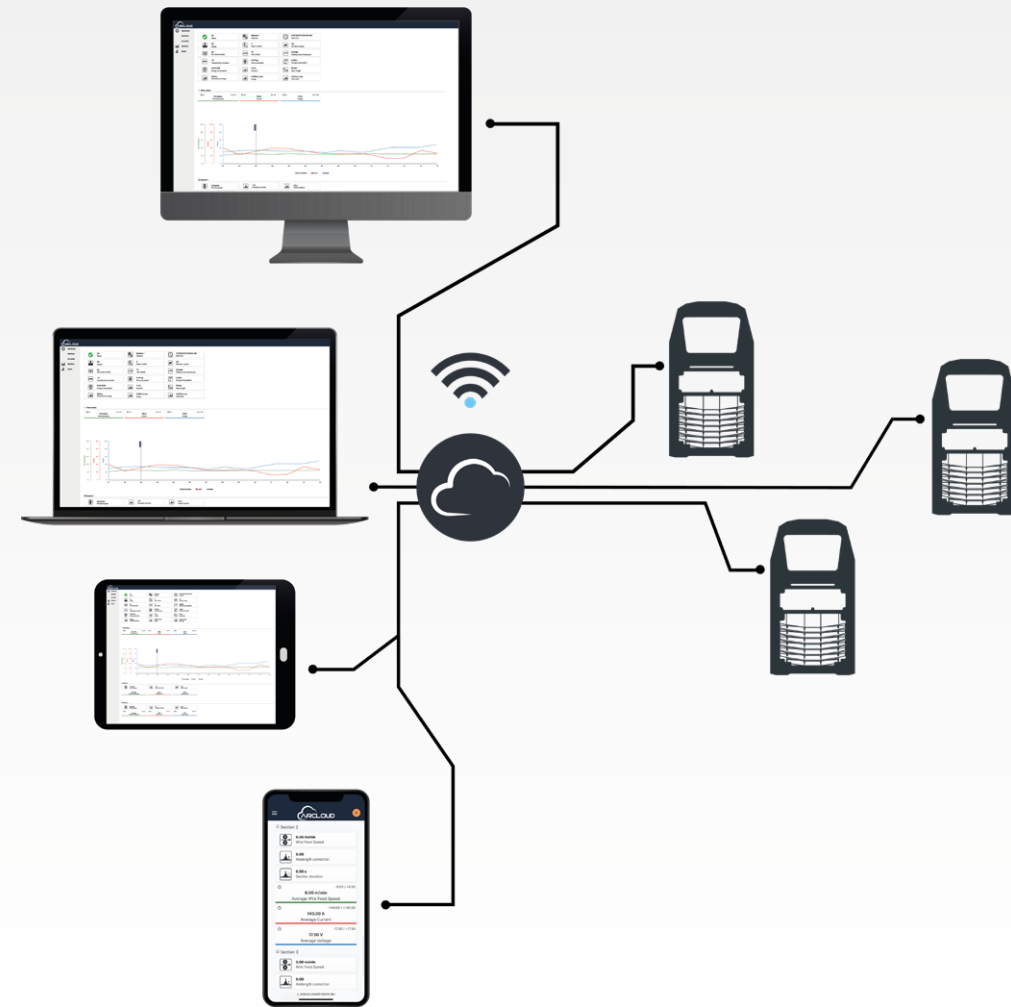

Combining our digital transformation arguments with our global vision, we are the innovation leader in Turkey with our products with digital communication infrastructure, fully compatible with robots, and advanced arc welding programs.

2

OUR TECHNOLOGIES COMPATIBLE WITH INDUSTRY 4.0

As Kolarc, we take our strength from technology and innovation, and move all our workflows and processes to the digital environment. We offer fast, safe and efficient solutions in the field of data management with the ARCloud technology we developed for the complete recording and analysis of source data.

3

OUR CUSTOMER-FOCUSED APPROACH

Thanks to the mobile application we have designed to communicate effectively with our customers, we offer you a unique experience with our customer relations management system, where you can share your requests and control all processes.

4

OUR APPROACH TO QUALITY

At Kolarc, we attach importance to quality assurance throughout the life cycle of our products. In this direction, we attach importance to the compliance of our products with quality standards in the design and material selection processes. We carefully test the performance evaluation processes of our products. Thus, we meet the expectations of our customers with our quality approach.

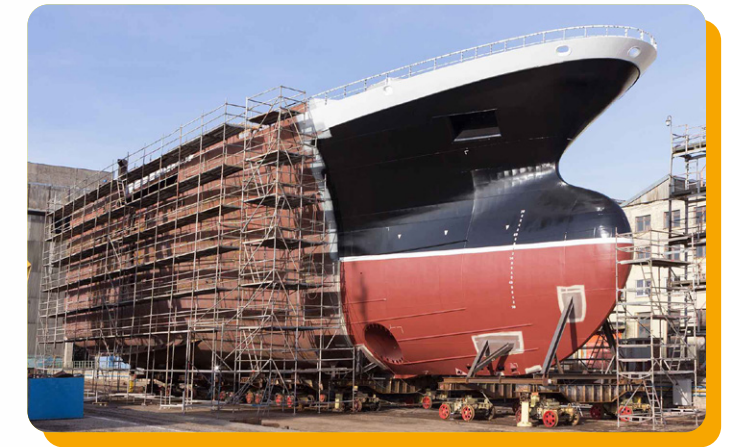

5

ENVIRONMENTAL POLICY

- Kolarc has adopted the principles of Sustainable Development in all its fields of activity in order to leave a livable world to future generations. In line with the principle of respecting people, the environment and society, which is among our founding values:
- To effectively implement the Environmental Management System, which defines responsibilities, goals and objectives and monitoring of environmental performance, focused on preventive approach and risk-based thinking,
- To improve continuously by using innovative and creative approaches,
- To continue our activities in compliance with the relevant national and international legislation and standards and the expectations of our parties,
- It is our primary responsibility to increase the environmental awareness of our employees and stakeholders.
- Kolarc, in this context
- To protect global resources, to ensure efficient use of energy and materials,
- Preventing pollution and minimizing waste,
- It aims to reduce the negative environmental effects of our activities and products in all processes from design to the end of their life cycle.
- These principles are in all our processes; will be our guide in our relations with our suppliers, customers and other stakeholders.
- Kolarc, which provides products and services to the manufacturing industry; It deals with the Environmental Management System, Quality Management, Occupational Health and Safety System together and constantly improves it.
