**Made in Germany for the world
of Welding Technology...**

...with Know-how, Reliability and Passion since over 40 years.

ROHRMAN produces to make the practice of welding simpler, effective and more economical. This is the mission of our company. National, across Europe and beyond borders, ROHRMAN products enjoy an excellent reputation. Founded in 1977 by Mr. Klaas Rohrman, the company has developed into an important partner of the welding industry and the success continues. Family owned in the second generation, the company is ready for the future of welding.

With excellent know-how, experience and best technology our highly motivated team meets the individual requirements of welding distributors and the welding industry.

The complete program around Welding.

Over 40 years ago ROHRMAN started the production of welding torches. Today ROHRMAN offers a wide range of products for different welding technologies and applications. From standard series to individual products, the quality is always at the highest level. ROHRMAN manufactures welding torches in different performance classes and sizes suitable for all welding machines. This large variety offers solutions for advanced welding tasks, today and in future.

ROHRMAN highly appreciates to meet individual customer requirements in its daily work: white-label, special confectioning and special series. Feel free to contact us for more information.

ACCESSORIES

Our requirement: quality and perfection of each individual product.

The modern welding industry requires safe, user-friendly and high performance products. ROHRMAN meets these requirements offering the latest developments and innovations to its clients. Each product is carefully being tested regarding material quality, durability and handling properties. Thereby the norms' standard is exceeded. Ergonomics and comfort are constantly being optimized, too, to permit effective and comfortable welding. Next to our own products we offer the premium brands WeldTec®, Speedway®, iHead® Heliweld II™ and original TEC® of our long-term partner TEC Welding Products Inc., USA.

Production planning

Torch assembly

Production talk

Continuous development is an integral part of our philosophy. Thanks to our partner in USA, we were the first to introduce TIG torches with silicon insulation in Germany. The innovation of products comes for ROHRMAN in the first place which is highly appreciated by welding experts. Many users confirm: anyone who has welded with ROHRMAN products once remains for a lifetime!

What is needed will be done. In more than 35.000 varieties.

The variety of different welding torches in different performance classes and sizes for the many OEM manufacturers brings a virtual unbelievable number of combinations. Here ROHRMAN is particularly flexible. Our components store allows at any time the production of all varieties.

Good to know that ROHRMAN has developed a multi-fused software system, with which, after many years the same torch exactly can be reproduced.

Torch assembly

Work-processes and production of components are largely automated but the welding torch assembly is handcraft work - and will not change so quickly. Our workers are all qualified professionals, whose long term experience and expertise is by no means replaceable. Despite the complex assembly, we attach great importance to efficiency in order to offer our customers the best possible conditions.

Flexible, fast and with best service. You can rely to ROHRMAN!

Highest product quality is our base. What sets us apart is more: We are welding consultants, helper and problem solver. We live for welding and offer an uncomplicated service of an owner lead company who considers the importance of every customer. Beyond all innovation we keep traditional values as there are reliability and honesty. As a partner we support the welding industry any time. In this sense: We are looking forward to hear your requirements!

Company headquarters in Germany Viersen

Kasper Rohrman

Florian Rohrman

The objectives for the future are placed. Since 2010, the next generation of the family, Florian and Kasper Rohrman, has taken over the management of the company. Since the end of 2015 new halls and offices have been provided with sufficient space for growth and new tasks. Sustainability and future-proofing are on the company's agenda.

„We want to improve every day“, says Kasper Rohrman and Florian Rohrman adds: “the technical challenges of the future are clear - we tackle them.“
