Are you looking for a more sustainable and efficient way to manage welding wire?

Discover **Konik Drum**: the revolutionary, sustainable, and patented drum for welding wire. Thanks to its unique design, it easily transitions from a conical to a cylindrical shape, minimizing the risk of wire jamming during unwinding. Made entirely from **recycled plastic** and reusable multiple times, Konik Drum helps reduce CO₂ emissions by 81.4%. Additionally, its design optimizes space, allowing you to store 17 Konik drums in the same space as 3 traditional drums.

Save on transportation and storage costs, and protect our environment.

Main Advantages

SAVE PLASTIC 

 SAVE TRANSPORT

SAVE SPACE 

 SAVE MONEY
