

## ELECTRON BEAM WELDING

TECHMETA ENGINEERING (TECHMETA) is a French company internationally recognized for its expertise in Electron Beam Welding that it develops since 1964. TECHMETA rises up to challenges on a daily basis to accompany you further in your welded products developments with two main activities: outsourcing and machine manufacturing.

Our company is here to provide you with the welding solution that best fits with your welding needs. In fact, our wide range of machines will please your expectations depending on your part size, material and your capacity... If you already have an Electron Beam Welding machine, TECHMETA is able to upgrade it, no matter its brand, since TECHMETA is also upgrades its competitors machines.

TECHMETA has the largest job shop in Europe and has several contracts from leading aircrafts industries such as Boeing, Airbus and from other engine manufacturers and other tier 1 suppliers.

TECHMETA has already realised machines for the Japanese market, especially for HONDA and we are present in many countries such as India (over 25 years of presence), China (more than 100 machines), Korea or the United States...

Our technology and expertise enables us to work for many fields of competence, from aeronautics to nuclear, aerospace, automotive, defence, research and physics, and even luxury and railways.

Thanks to the flexibility and responsiveness of its teams, TECHMETA has already spreaded 400 machines worldwide, fulfills quality expectations, provides an after-sales service once your machine is delivered and trains your teams.
