IN WHALE SPRAY WE OPEN A WORLD OF POSSIBILITIES IN THE MOST ADVANCED WELDING CHEMICALS

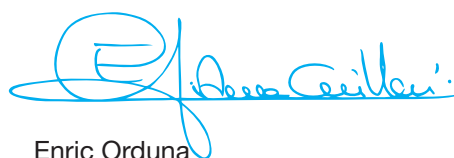

The Whale Spray Team.

We have a vocation to go ahead. We are that way. We want to be pioneers and open paths in the world of chemicals in the welding sector.

That is why we live in a permanent evolution and renewal, trying every day to overcome ourselves by innovating, but also with the intention of guaranteeing the highest quality to our customers. That is why, our commitment is based on achieving the best results in the welding sector, ALWAYS and at **Whale Spray** always means always.

We open the door to chemicals for the most advanced welding processes, both in precision and performance, so that you, our customers, can get the optimal results.

We have an endorsement of more than 25 years of experience, the trust of important business groups and our own laboratory, which is dedicated entirely to experimentation, R & D & I and the development of special formulations. Only in this way can we offer high technology solutions, unbeatable from a technical and economic point of view. Are you following us?

Enric Orduna
CEO in Whale Spray

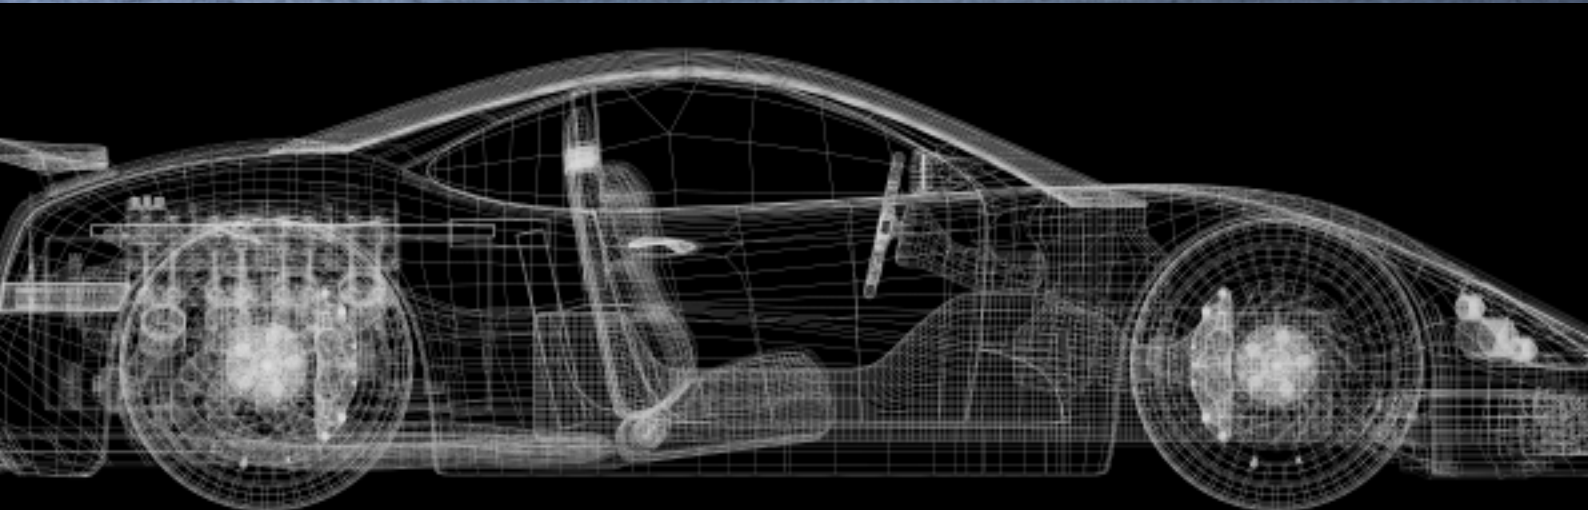

ALWAYS AT THE VANGUARD OF THE CHEMICALS IN THE WELDING SECTOR

Currently **Whale Spray** is in the TOP 1 European innovation in the welding sector. In addition to having one of the widest ranges in the market in spray and bulk, our R & D department has the best chemists in the sector and that allows us to offer any type of solution in the welding sector.

If you need a product and we do not have it, we develop it without any problem for you, with the maximum quality, since at **Whale Spray** we value equally the quality of the product and the customer service, that is why we not only sell chemical products, but offer solutions.

WE ARE PRESENT IN THE MOST IMPORTANT SECTORS OF INDUSTRIAL MANUFACTURING

Thanks to our experience in aerosols and chemicals, combined with our passion for innovation, we can be present in a large number of industrial sectors with great results in all of them. We adapt our products to the needs of the sector and the client so that we can be present in sectors such as:

- Steel.
- Aerospace - Aeronautics.
- Agricultural.
- Power supply.
- Agricultural / Agricultural.
- Graphic arts.
- Automotive.
- Cement.
- Electronics.
- Renewable energy.
- Pharmacy and cosmetics.
- Railways.
- Wood.
- Metallurgy.
- Military.
- Mining.
- Nuclear.
- Public Works.
- Paper / Cardboard.
- Fishing.
- Plastic / Rubber.
- Chemical.
- Textile.
- Glass.

OUR RANGE OF WELDING PRODUCTS IS THE MOST COMPLETE OF THE MARKET

From the A of Antispatter to the Z of Zinc, the range of **WS** welding chemicals is the only complete range on the market. In **Whale Spray** we cover all the needs of the sector without exception since our philosophy is to make life easier for our customers offering a wide range, backed by our experience and in addition to the passion that we put in the formulation and manufacture of all and each of the **WS** products.

Antispatters	Name	Description	Format
	WS 1800 S Oil Based Biodegradable Antispatter	Antispatter Biodegradable Spray, silicone-free, long film life. Ecologically safe. Extends the life of the nozzles and welding elements. Suitable for tools, nozzles. Manual and Robotic Welding.	Box 12 x 400 ml
	WS 1800 G Oil Based Biodegradable Antispatter	Antispatter Biodegradable Spray, silicone-free, long film life. Ecologically safe. Extends the life of the nozzles and welding elements. Suitable for tools, nozzles. Manual and Robotic Welding.	· Box 1 x 5 L · Drum 25 L
	Antispatter WS 1801 S Non-flammable Antispatter	High performance antispatter provides a quick, easy and safe way to prevent the adherence of projections on any metal surface. Biodegradable, compatible with painting processes. Welding without pores. 0% harmful effects. Excellent on all types of surfaces including galvanized surfaces.	· Box 12 x 400 ml
	WS 1801 G/10D Non-flammable Antispatter	High performance antispatter provides a quick, easy and safe way to prevent the adherence of projections on any metal surface. Biodegradable, compatible with painting processes. Welding without pores. 0% harmful effects. Excellent on all types of surfaces including galvanized surfaces.	· Box 1 x 5 L · Drum 25 L
	WS 1802 G Special Robotics Antispatter	100% synthetic product. It guarantees protection at maximum temperature. Very good pulverization. Does not generate toxic vapors. Specially developed for use in robotics.	· Box 1 x 5 L · Box 6 x 1 L · Drum 25 L · Drum 200 L
	WS 1803 G Water-based Antispatter	Antispatter Biodegradable Spray, silicone-free, long film life. Ecologically safe. Extends the life of the nozzles and welding elements. Suitable for tools, nozzles. Manual and Robotic Welding.	· Drum 25 L · Drum 200 L

Antispatters

Ceramic WS 1805 S Ceramic Antispatter

Innovative antispatter, 100% ceramic that protects treated surfaces up to 8 hours. Thanks to its extraordinary resistance to temperature above 1400°C. Protection of surfaces, positioners, parts, nozzles in welding processes: MIG, MAG, Laser and plasma cutting.

· Box 12 x 400 ml

WS 1805 G Ceramic Antispatter

Innovative antispatter, 100% ceramic that protects treated surfaces up to 8 hours. Thanks to its extraordinary resistance to temperature above 1400°C. Protection of surfaces, positioners, parts, nozzles in welding processes: MIG, MAG, Laser and plasma cutting.

· Box 1 x 5 L

ND Tests

Crack 1 WS 1820 S Red Penetrating Liquid

Special for NDT tests Inspection of welds, castings, forges. Removable with water and solvents. Excellent penetration by capillarity.

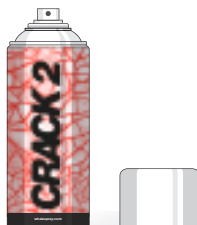

· Box 12 x 400 ml

Crack 1 WS 1820 G Red Penetrating Liquid

Special for NDT tests Inspection of welds, castings, forges. Removable with water and solvents. Excellent penetration by capillarity.

· Box 1 x 5 L

Crack 2 WS 1821 S White Revealer Liquid

Special for NDT tests Inspection of welds, castings, forges. Removable with water and solvents. Very fast special drying formula, reveals defects on the surface.

· Box 12 x 400 ml

ND Tests	Name	Description	Format
	Crack 2 WS 1821 G White Revealer Liquid	<p>Special for NDT tests Inspection of welds, castings, forges. Removable with water and solvents. Very fast special drying formula, reveals defects on the surface.</p>	<p>· Box 1 x 5 L</p>
	Crack 3 WS 3050 S Penetrating Liquid Eliminator.	<p>High cleaning power and quick drying. It leaves no residue, no stain or corrosion. With 360° valve. 97% active.</p>	<p>· Box 12 x 400 ml</p>
	Crack 3 WS 3050 G Penetrating Liquid Eliminator.	<p>High cleaning power and quick drying. It leaves no residue, no stain or corrosion.</p>	<p>· Box 1 x 5 L</p>

Leak Detector	Name	Description	Format
	WS 1822 S Non-flammable Gas Leak Detector	<p>It detects and locates gas leaks quickly and efficiently. Excellent visibility of the leak. Stable and safe, non-staining and non-corrosive. Packed with nitrogen and classified as Non Flammable.</p>	<p>· Box 12 x 400 ml</p>

Anticorrosives

Name

Description

Format

Zinc Mate
WS 1544 S
Pure Matt Zinc

Excellent for retouching galvanized surfaces.
Excellent resistance to corrosion and rust.
Flexible and hard film.

· Box 12 x 400 ml

Zinc Brillo
WS 1545 S
Bright Zinc

Coating that combines Zinc and aluminum.
Excellent coverage and drying that protects
against corrosion with a glossy finish.

· Box 12 x 400 ml

WS 1547 S
Zinc 99,99%
Bright

Pure Zinc protective coating with quick
drying and gloss finish. Unique special formula
in the market to get a gloss finish only using
pure zinc.

· Box 12 x 400 ml

Inox Mate
WS 1548 S
Matt Stainless
steel Coating

Coating formulated with stainless steel.
Ultrafast drying, very good coverage, good
elasticity, resistant to temperatures. Matt finish.

· Box 12 x 400 ml

Inox Brillo
WS 1549 S
Bright Stainless
Steel Coating

Coating formulated with stainless steel.
Ultrafast drying, very good coverage, good
elasticity, resistant to temperatures.
Gloss finish.

· Box 12 x 400 ml

Degreasers	Name	Description	Format
	WS 3910 G	Specially formulated for the cleaning and degreasing of all type of torches. It eliminates all types of embedded dirt and residues without any need of mechanical efforts. The torches are cleaned by immersion. Dilute with water.	· Drum 25 L
	Torch Cleaner		

Stainless Steel Degreasers	Name	Description	Format
	WS 3077 G	Special for cleaning and maintenance on stainless steel surfaces. Cleans and polishes leaving an invisible film that prevents fingerprints and traces to appear again.	· Box 1 x 5 L · Box 12 x 750 ml
	Cleaner, brighter and stainless protector		
	WS 3616 G	Highly effective acid liquid for the degreasing prior to the stainless steel pickling and passivation processes. Removes all types of organic waste from surfaces.	· Drum 5 L · Drum 30 L
	Degreaser prior to pickling or passivation		

Pickling for Stainless Steel	Name	Description	Format
	WS 3610 G	Pickling gel for all types of stainless steel and nickel alloys. It has a high effectiveness and speed of pickling. Does not contain hydrochloric acid or chlorides. Special red color. Includes brush.	· Box 4 x 2 Kg
	Pickling gel for welding beads		

Pickling for Stainless Steel

WS 3627 G
Pickling gel for pulverization

Special pickling gel for stainless steel of all grades. Special for spray pickling, very thixotropic with excellent adhesion, provides a uniform finish.

Format

· Drum 30 Kg

Stainless Steel Passivation

WS 3633 G
Passivant liquid by immersion

It quickly and completely forms a passive protective layer on the treated surfaces. Restores resistance to surface corrosion. Significantly increases stainless steel life. Maintains the original visual finish, does not attack the base material. It should be diluted between 1: 1 and 1: 4 in deionized water.

Format

· Drum 40 Kg

WS 3634 G
Passivant gel for pulverization

It quickly and completely forms a passive protective layer on the treated surfaces. Restores resistance to surface corrosion. Significantly increases stainless steel life. Maintains the original visual finish, does not attack the base material. Excellent thixotropic properties.

· Drum 30 Kg

Stainless Steel Specialties

WS 3622 G
Stainless steel restoration treatment

Innovative product that restores and recovers the original finish of the surface. Eliminates rust, dirt and stains by increasing corrosion resistance.

Format

· Box 6 x 1L
· Drum 30 Kg

Stainless Steel Specialties

WS 3642 G Pickling neutralizing gel

When applied on hydrofluoric and nitric acids neutralizes them. Easily removable with water. The reaction is complete when it stops making bubbles.

• Box 4 x 2 Kg

Spray Equipment

WS Chemical pulver manual Manual pulverizer special for acids

Sprayer with 5 L tank special for picklings, passivants and degreasers. Equipped with lance and acid resistant materials.

• 1 unit
