

VISIT

A brand of ASTRUM IT

BRING YOUR PROCESSES INTO FLOW

Manage guests, suppliers and external companies optimally

The only visitor management system with the digital fluid concept. Increase the productivity of your company, relieve your staff, gain capacity. The visitor management system By means of VISIT, you can efficiently manage, monitor and keep track of the activities of external persons and vehicles on your company premises or event venue. In real time. In one dashboard only. 100 % GDPR compliant.

YOUR AUTOPILOT FOR EFFICIENT VISITOR MANAGEMENT

Get the management of external persons and companies on your premises simplified and automated. VISIT will help you to reduce the burden on your staff, make capacities available, optimize your workflow, and boost your productivity. Standardized processes that additionally comply with all legal requirements significantly increase the level of security on all your sites – and can be perfectly analyzed.

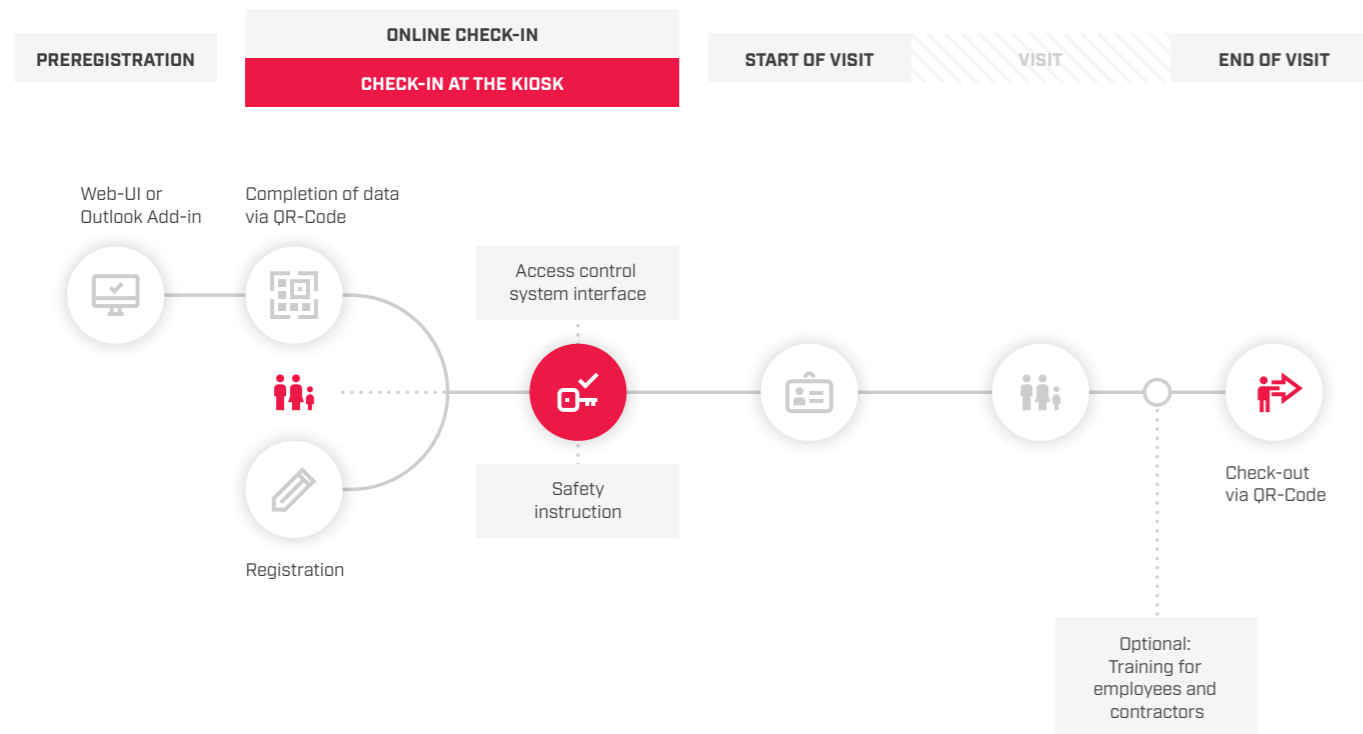

SIEMENS
Ingenuity for life

“We wanted to structure visitor management at Siemens gates in a new way, and decided to introduce a uniform solution for all German sites. Our aim was to considerably reduce the waiting time for our visitors, and to significantly lower the workload of our staff. Since 2014, nearly all our German Siemens sites with staffed reception desks have been using the visitor management system that fully covers all our requirements and is fit for future optimizations as well.”

Manfred Schnorrenberg
Head of Security Management Siemens SRE Germany

SET NEW STANDARDS

VISIT will help you to establish company-specific security workflows, and interlink your process steps in a flexible system. User-independent. Consistent. Efficient.

Intuitive operation

New employees are fully capable of operating VISIT after a brief introduction only. Every authorized person can monitor and keep track of every activity on the company premises at all times. In real time. In one dashboard only.

Flexible scalability

Add further packages to your VISIT Basic whenever required. This will allow your VISIT system to grow in line with the requirements of your company.

Unstaffed processing

Prevent bottlenecks: With the help of VISIT, you can have your entire visiting process automated – from appointment coordination to check-out. With personal reception – even without the receptionist.

Detailed documentation

You can easily evaluate and optimize your processes by means of VISIT. On the basis of detailed documentation, you can even support future investment decisions. And the expertise will remain within the company even in case of staff changes.

Efficient e-learning

Provide your staff members and external persons with training via the VISIT E-learning module. From notification to the training session at the workplace or from home – you will always keep track of it all.

Complete campus solution

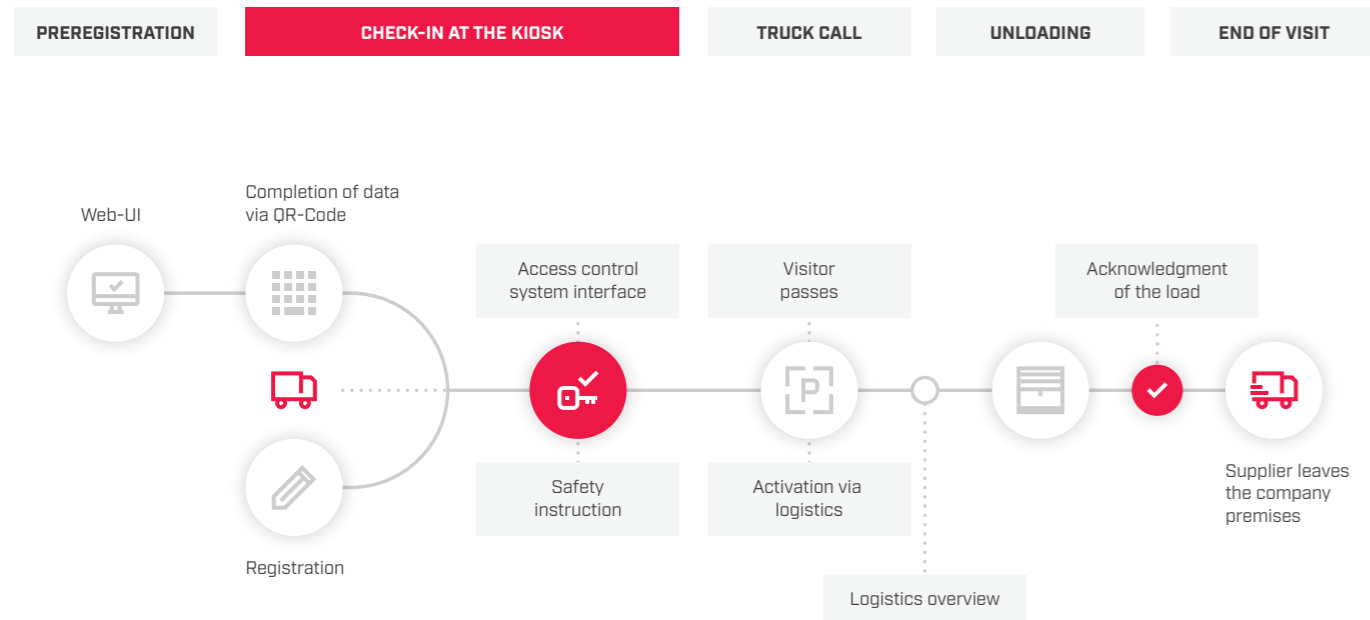

Make use of VISIT to manage the visits from several companies or organizations on one site. Due to the automated standards, all individual requirements regarding security, workflow and appearance have been considered.

PRODUCTIVITY BOOST FOR YOUR WORKFLOW

Some 50 % of VISIT customers currently use the additional VISIT Logistics package to ensure efficient delivery management and ramp scheduling: This package will help you to significantly minimize the holding and waiting time of trucks and suppliers. You can automate and optimize the logistics workflow on your company premises, reduce the workload of your staff, make capacities available, and develop new standards for a significantly higher security level on all sites.

TAKE THE DECISIVE STEP

With VISIT Logistics, you align the logistic processes on your company premises with optimized standards. This makes workflow and traffic flow significantly more efficient.

“Thanks to the software by ASTRUM IT, I can be quite confident that our processes in connection with visitor and HGV traffic run as they should. If any problems nonetheless occur, these are immediately rectified by specialists.”

Silviu-Cornel Wagner
Head of Security & Technology, Division Audit Services

Unstaffed visit processing
Resolve bottlenecks easily: The suppliers announce themselves via self-service – the automatic vehicle recognition does the rest on site.

Lower costs
Reduce your process costs by more than 50 %: In the central logistics and loading area overview of VISIT, you can create transport orders, and optimally manage loading and unloading processes.

Reduced holding and waiting time
Make supplier processing faster: Everyone can self-register with their national language by means of the self-service in VISIT. After that, the user will be notified about their turn via pager, tablet or screen.

Systematic safety and security
Every step is a safe one: Suppliers can pass and sign their safety instructions automatically via a kiosk solution or a tablet. Automatic identification documents check, cargo securing acknowledgment – completely covered.

Intuitive handling
New employees are fully capable of operating VISIT after a brief introduction only. Every authorized person can monitor and keep track of every activity on the company premises at all times. In real time. In one dashboard only.

Detailed documentation
You can easily evaluate and optimize your processes by means of VISIT. On the basis of detailed documentation, you can even support future investment decisions. And the expertise will remain within the company even in case of staff changes.

YOUR PROCESSES IN DIGITAL FLUID

The only visitor management system with the digital fluid concept: VISIT builds on your existing IT systems in an entirely seamless manner, and connects your processes to a flexible, elegant workflow. For efficient workflow and effortless operation. VISIT is used globally and constitutes the central system for all your sites.
