

About Us

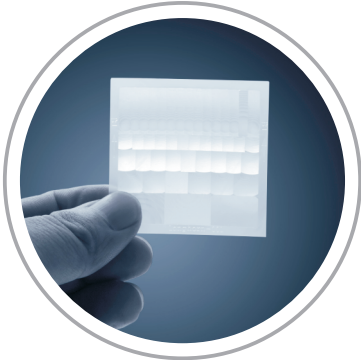

Established in 1995, China Security&Fire IoT Sensing CO., LTD (previous as Shenzhen Longhorn Security Technology Co.,Ltd) , a division of China Security & Fire Technology CO., LTD (listed company:SH600654), is a professional IoT sensors designer and manufacturer.

We have developed from Alarm Systems to IoT Sensors for 22 years history in security products. We have been benefiting from our constant devotes on technology innovation, and we gained more than 200 different patents and certificates. We can provide the products for the sensing for IoT systems including Zigbee/RF sensors, such as PIR motion detectors, magnetic contact, smoke detector, gas detector, water detector, temperature detector and siren, iHorn Cloud, APP etc. Every product can attain the standard of International approval ,such as CCC、CE、FCC、E-mark、ROSH or EN approval 。 Our products has been exported to more than 60 countries as well as it has been used in "The Water Cube","National Museum Shanghai World Expo",etc.

We have been well known as “China Top 10 National Brand” for 13 years, “China Top 10 security Brand” , “China Top 30 Golden Security Suppliers” , “China Best Known Security Enterprises” , “ Recommends Brand for Safety City” etc, and also with “NPS” from American Association for Industrial Security and “Top 100 Enterprises in Shenzhen” . The global view, the leading R&D , the most strict quality control systems, the best complete solutions, the mature global marketing network and excellent teamwork make us distinguishable. We are always adhering to the ideal of “hard-working constant innovation, accurately realistic excellence” and focus on IoT sensors design and manufacturer to make everything well connected.

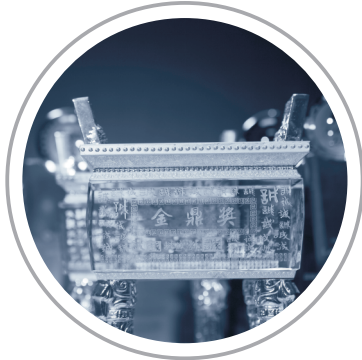

Competitiveness

Wireless Technologies and Detection Technologies

- Wireless Technologies: Zigbee, WiFi, ASK433MHz, FSK433MHz, Z-Wave, LoRa etc.
- Detection: full range of products, from PIR Motion Detector, Magnetic Contact, Gas Detector, Smoke Detector, Water Detector, Temperature Detector, Siren etc.

The leading Brand in China Security Industry

- The only company involved in making the standards for intrusion alarm products in China;
- 12 years rewarded as “top10 national brand in china” ;
- Compliant with EN, CE, UL, CCC etc.
- High flexibility and ability to connect our the sensors to other cloud or devices and App.

22 Years in R&D, Design and Manufacture

- More than 200 patents; strong team of ID and R&D;
- The strict quality control from R&D to manufacturing;
- The professional facilities in special tests.
- Assembly, tooling, injection and SMT;

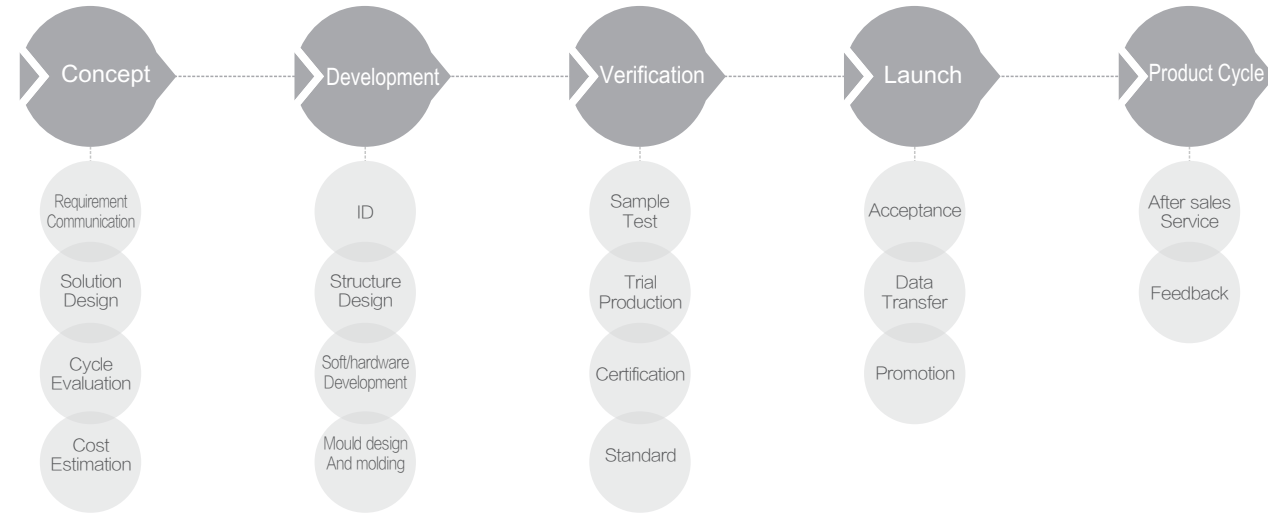

Cooperating with Well-know Companies

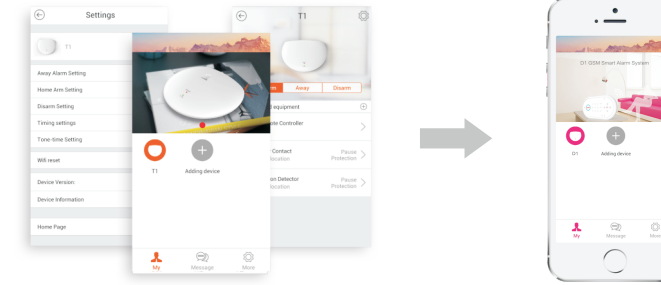

- Cooperating with the companies such as Huawei, Vanke, Hikvision, Honeywell etc;
- ISO9000、ISO14001、OHSAS18001 approved.

One-stop ODM or OEM Capability

Product

Facilities and platform access

APP

With the self-designed and developed APP, IHORN Smart, We can offer the ODM or OEM to you, such as Startup Interface, Banner, other UI etc.

Cloud

iHORN Cloud can provide ODM or OEM service for users to meet particular market demand of important project, such as server deployment, data management, platform access etc.
