

Corporate Fact Sheet

About Genetec

Genetec Inc. is an innovative technology company with a broad software portfolio that encompasses security, intelligence, and operations solutions. The company's flagship product, Genetec™ Security Center, is an open-architecture platform that unifies IP-based video surveillance, access control, automatic license plate recognition (ALPR), communications, and analytics. Genetec also develops cloud-based solutions and services designed to improve security, and contribute new levels of operational intelligence for governments, enterprises, and the communities in which we live. Founded in 1997, and headquartered in Montreal, Canada, Genetec serves its global customers via an extensive network of certified channel partners and consultants in over 80 countries.

Solutions

The company offers a broad solutions portfolio that encompasses security, operations, and intelligence tools, to protect, manage, and understand the everyday.

Security: Protect the everyday

Genetec™ Security Center unified security platform

- Security Center Omnicast™ - video management
- Security Center Synergis™ - access control
- Security Center AutoVu™ - automatic license plate recognition

Genetec Stratocast™ - cloud-based video monitoring

Hardware and appliances

- Genetec Streamvault™ - security infrastructure solutions
- Access control hardware
- Automatic License Plate Reading (ALPR) cameras and devices

Operations: Manage the everyday

- Genetec Mission Control™ - collaborative decision management system
- Genetec Clearance™ - digital evidence management system
- Genetec ClearID™ - physical identity and access management system

Intelligence: Understand the everyday

- Genetec Citigraf™ - strategic decision support system

Services, Support & Community

Professional Services

Our team of professionals offer remote and on-site services that can be tailored for all types of projects from straightforward to highly complex.

By working with our certified channel partners, we help optimize system performance, mitigate project risks, and ensure the successful delivery of any project. Whether you're handling a mission-critical security upgrade or need some guidance on cybersecurity best practices, we're here to help. We work alongside your team to help build and maintain a security system that you can grow with and rely on for years to come.

Genetec SDK and DAP

With Genetec™ Security Center, you can expand your security platform by integrating additional systems and adding custom functionalities. Our development tools provide varying levels of access to the core technologies within Security Center.

You can opt for complete video surveillance, access control, intrusion detection, analytics, and automatic license plate recognition functions through a single Software Development Kit (SDK) or select a smaller package that better suits your needs.

Genetec A&E Consultant Program

We created the Genetec A&E Consultant Program to provide architects, engineers, and security consultants with a dedicated team who understands the complexity of your projects.

Genetec Advantage

Genetec Advantage™ is a comprehensive software maintenance package that progressively grows the value of your security system and allows you to focus on your operations.

Channel Partner Program

Our Channel Partner Program is designed to support and reward highly skilled and certified security service providers. Because when we build loyalty and trust with our channel partners, it's our mutual customers who ultimately reap the benefits.

Technology Partner Program

Our Technology Partner Program is the pathway to building secure and reliable integrations with Genetec solutions.

As a partner, you'll gain access to all the latest tools and support needed to easily integrate your security systems and devices with the Security Center platform. You'll also be able to create and strengthen partnerships with other leading technology providers and maximize co-marketing opportunities.
