

MOBIQAM

RAPID DEPLOYMENT SURVEILLANCE

REVOLUTIONISING THE MONITORING INDUSTRY

Mobiqam is an autonomous, mobile, monitoring system that can be rapidly deployed and managed in any location. As a surveillance system designed for temporary needs, Mobiqam is easy to use, reliable, and cost-effective. This has made Mobiqam the go-to solution for local authorities, event organisers, and construction companies.

MOBIQAM.com®
RAPID DEPLOYMENT SURVEILLANCE

RAPID DEPLOYMENT

Mobiqam is fast and easy to deploy. Everything is up and running within 5 minutes.

PRIVACY BY DESIGN

The Mobiqam Portal is fully secured to ensure the privacy of all users. Whether you are connected to 5G/4G, WiFi, or cable network. All communication is encrypted end-to-end, so hackers don't stand a chance.

ONE PORTAL FOR ALL MOBIQAMS

The Mobiqam Portal grants access to an intuitive, secure platform in which you can consult video or other information, wipe data, check memory capacity or battery level and see the location of each Mobiqam. Add users and manage them as you wish. Set notifications for any kind of events such as low battery, sensor activity or shock detection.

THE BEST BATTERY IN THE INDUSTRY

Multiple battery options with a maximum battery autonomy up to 7 days. Its revolutionary click system makes it easy to interchange batteries. You won't even need to take down the Mobiqam unit, just swap the empty battery with a fully charged one while the unit stays in place. Easy as that.

ANY CONNECTION YOU NEED

Connectivity options are 5G/4G, Wireless Point-to-Point, WiFi (client and access point), ethernet connection to your private network, and a commercial Internet uplink.

CHOOSE THE SENSORS YOU WANT

Mobiqam is designed to work with a variety of sensors. Each situation can be provided with the right solution. Ask for our approved vendor list.

MOBILE SURVEILLANCE SOLUTION WITH EASILY REMOVABLE MEDIA

Simply unplug the USB drive and you've got the data you need in your hands and easily swap the drive with a new one.

TRACK ITS LOCATION AT ALL TIMES

With its built-in GPS system, you always know where your Mobiqam is located. Set a geofence around your Mobiqam to prevent unauthorised movements or theft.

100% MADE IN BELGIUM

Mobiqam is a product of our own research and development and is produced in Europe. Direct support from the manufacturer is guaranteed for all partners.

WHY IT WORKS

Applications

RAPID DEPLOYMENT SURVEILLANCE SOLUTION FOR LOCAL AUTHORITIES

Local authorities use Mobiqam as an addition to their existing network, to aid police campaigns against vandalism, traffic, fly-tipping and littering and provide city officials with data driven smart city decisions.

SECURITY REINFORCEMENT DURING EVENTS

Events use Mobiqam as a quick and intelligent temporary security solution as it allows to act quickly and decisively. Combine Mobiqam with a Wireless Point-to-Point connection and it's the ideal solution for live monitoring events.

PROTECTING CONSTRUCTION SITES AND HEAVY EQUIPMENT

Contractors use Mobiqam to protect construction sites, workers and heavy equipment as well as improve productivity. For marketing purposes, Mobiqam can also be used as a time-lapse camera.
