

# Complete ATM Protection

The world's only complete ATM protection system

# a2m active

## a2m active is more than just a smart cash cassette.

This is the next generation in ATM cash protection, with intelligent remote management and attack detection sensors. **a2m active** is a fully integrated system within the ATM safeguarding from all types of attacks. Control **a2m active** with two-way encrypted radio via the **hub+** to monitor, send commands and operate remotely.

Our closed cash system protects the **a2m active** cassette contents throughout the cash life cycle. Keep cash secure during first line ATM maintenance, reducing downtime to keep your operations efficient. Secure, across pavement protection can be upgraded by using an **ibox cassette**.

This secure cash cassette holds the same amount of banknotes as a standard ATM cassette, so you can maintain your replenishment schedule.

Intelligent sensors detect any type of attack and automatically release our specialist IBNS ink stain, permanently neutralising the cash value. Use with **CRIMETAG®**, our unique forensic tracing technology to trace cash and provide an evidence chain.

**Protect cash in your ATM network; whether it is transported, replenished, or stored.**

↑ a2m active range from Secure Innovation

↑ Two-way encrypted radio communication with the **hub+** continuously monitors and reports the status of the **a2m active**.

↑ **a2m active** can be transported in an **ibox cassette** across the pavement for increased security.

↑ Sensors detect an attack and automatically release the permanent ink stain. Add **CRIMETAG®**, our unique forensic tracing technology.

# How can a2m active improve your business?

- **Improve customer services.** Reduce ATM downtime with secure **a2m active** cassettes during maintenance.
- **Minimise costs.** **a2m active** can be configured to work with any ATM cash replenishment schedule and holds the same amount of notes as a standard ATM cassette.
- **Reduce losses.** IBNS ink stain technology has been fundamental in minimising losses due to reducing rewards for criminals.
- **Improve efficiency.** Monitor and control **a2m active** remotely and review status data.
- **Provide safety.** For your staff and the public.

## The next generation of ATM cash protection is here.

A complete system designed to protect your ATM network from any physical attack. Removing the reward for criminals.

	<b>Safe Solution</b> Deters criminals, uses no harmful or toxic substances, pyrotechnics or explosives		<b>Audible Alarm</b> Emits a signal when in a pre-programmed high-risk state		<b>Two-Way Radio</b> Two-way communication between the <b>a2m active</b> cassette and the remote dashboard to enable security teams to react to threats
	<b>Simple   Easy To Use</b> Simple and easy to use, <b>a2m active</b> slides into your ATM like any other cash cassette		<b>Removal Detection</b> <b>a2m active</b> cassette knows when it has been removed from a safe location such as in the ATM, or an ibox cassette inside a CIT vehicle		<b>Wi-Fi Connection</b> Internal Wi-Fi signal for reliable communication and connectivity
	<b>Automatic Response</b> Detects an attack and automatically releases our IBNS ink stain and optional forensic marker from <b>CRIMETAG</b> ®		<b>Movement Sensor</b> Can be programmed to detect any movement		<b>Seismic Sensor</b> Detects vibrations to protect against physical attacks from tools like angle grinders or drills
	<b>Universally Compatible</b> <b>a2m active</b> is compatible with all major types of ATM		<b>Tamper Detection</b> Detects any unauthorised attempt to open or break the <b>a2m active</b> cassette		<b>Liquid Detection</b> Detects liquids in the ATM and automatically responds
	<b>Value for Money</b> Deters criminals, reduces losses and works with your cash replenishment cycle		<b>Ink Degradation</b> Renders cash valueless using our IBNS ink stain, add our unique marker from <b>CRIMETAG</b> ® to trace stolen money		<b>Door Sensor</b> Detects unauthorised opening of the ATM safe door
	<b>Low Maintenance</b> Minimal servicing intervals and other maintenance checks		<b>Note Stop Function</b> Stops banknotes being dispensed from the ATM if there has been an attempted attack and all the notes inside are ink stained		<b>Solid Explosive Detection</b> Detects the infiltration of solid explosives into the ATM
	<b>Remote Management</b> Responses can be triggered from a dashboard remotely to the <b>a2m active</b> cassette, and override programmed responses		<b>ESD Protection</b> Removes risk of circuit board damage from static electricity		<b>Cash Slot Protection</b> Detects criminals forcing the cash dispenser slot
	<b>Timed Access</b> <b>a2m active</b> cassette can only be opened at designated times between locations		<b>Temperature Sensor</b> Detects extreme temperatures which indicate some types of attack		<b>Explosive Gas Detection</b> Detects numerous explosive gas compounds
	<b>Auto Alerts</b> Audible and visual alerts indicate status and actions		<b>Customised Solution</b> We can optimise the programming and integration of <b>a2m active</b> ® to suit your business needs		<b>Backup Battery</b> Safeguards from any power-loss or interruption to service
	<b>Status Updates</b> Optional status updates for ultimate visibility		<b>Hub+</b> A permanent installation inside the ATM to relay information between the <b>a2m active</b> cassette, the ATM and the remote dashboard		<b>Jackpotting Sensor</b> Detects use of illegal software to withdraw cash from ATM, and stops the attack by blocking access to the data
	<b>Internal Black Box</b> Records status, actions, time, attack and attempted attack data				<b>COMPATIBLE WITH</b> <b>ibox cassette, Remote Planet &amp; CRIMETAG</b> ®

**Secure Innovation is the global leader of intelligent protection products and custom control solutions.**

For over 40 years we have researched, designed and developed innovative solutions with cutting edge technology to protect people, and safely secure cash and high value assets.

**Listen. Innovate. Support.**
