

TECHNOMAX has over the years acquired a solid position, in Italy and in Europe, as one of the largest manufacturers of Passive Security for private, professional and hotel field.

Thanks to the acquired know-out and timely products adjustments to the market changes and to the changed customers' needs, TECHNOMAX has quickly developed and has diversified its manufacturing range and its sales strategies in each activity field.

Over 45% of the production is exported in all Europe, but also outside, and is purchased from the major foreign multinational retail chains specialized in DIY and from the most important foreign distributors operating in the Passive Security Market. Our products are appreciated and well-known in Italy and Europe for their "Quality at the Right Price".

The production facility has two modern sites and other two warehouses are used to store finished products, totally for a covered area of 13.000 m² located in S. Giovanni in Croce (CR), where the entire production cycle take place: planning, production, powder painting, assembly, final testing and packaging.
