

Dallmeier Press Release

Equipped for NIS-2 & Co. with video technology made in Germany

Dallmeier electronic at the Security 2024: Focus on CRITIS and partnerships with integrators

Regensburg, 7 August 2024 (Germany) – Dallmeier, a leading provider of intelligent security solutions, will present its latest innovations at this year’s Security 2024 in Essen. The focus will be on the security of critical infrastructure companies as well as the requirements of small and medium-sized enterprises. Installers and system integrators are also invited to find out more about the opportunities as a Dallmeier partner.

The focus will be on cybersecurity resilience, low total cost of ownership and achieving the highest possible objective security performance in video surveillance. Visitors to the barox stand (hall 5, stand B19) or the Advancis stand (hall 8, stand A15 / B15) will be able to see for themselves the benefits of “Made in Germany” solutions.

Video technology expertise for CRITIS operators

Against the background of increasing cyber threats, Dallmeier has also intensified its consulting services for critical infrastructure operators and their service providers and has built up extensive expertise in this area. Visitors to Security are invited to discuss with Dallmeier’s experts what conclusions can be drawn from the various legislative initiatives for video security technology.

Partner business and technology openness at VMS and analytics

In particular, the Regensburg-based company’s patented Panomera® multifocal sensor technology enables comprehensive monitoring of large areas and long distances with a minimum number of cameras. For end customers, this means maximum security performance with lower total cost of ownership and less complexity compared to conventional solutions. Specialist installers have the opportunity to differentiate themselves from the competition. In addition to the Panomera® systems, Dallmeier offers a complete portfolio of high-performance standard cameras from the Domera® family. For analytics and video management systems (VMS), installers have the option of using either Dallmeier solutions or joint solutions with leading technology partners, depending on their preferences or end customer requirements.

Dallmeier: Turn images into assets.

With pioneering video technology from Germany.

In 1984, Dieter Dallmeier founded what is now Dallmeier electronic – not in the proverbial garage, but in a garden shed in Regensburg, Germany. Today, the company, which can justifiably call itself a hidden champion for video information technology “Made in Germany”, has several hundred employees worldwide, more than 250 of them at the company headquarters in the centre of Regensburg alone.

Our customers: From commercial enterprises to World Cup stadiums

Dallmeier's camera, recording, software, and analysis solutions optimise security and processes for B2B end customers in a wide range of industries in over 60 countries. The focus is on users from the casino, smart city, airports, logistics, stadiums, and industrial sectors. But also, banks, critical infrastructure facilities as well as medium-sized companies from all sectors.

Low total cost of ownership “Made in Germany”

With pioneering innovations, Dallmeier has succeeded time and again in placing itself at the forefront of technology: From the world's first digital image storage system with motion analysis in 1992, the patented “multifocal sensor technology” Panomera® with its “Mountera®” mounting system, to the latest Domera® camera family, which allows up to 300 camera variants with only 18 components. These and many other innovations provide real, tangible customer benefits. And with a low Total Cost of Ownership (TCO) and a high Return on Investment (ROI) they can easily compete with systems produced and supplied from low-wage countries.

Cybersecurity, data protection and ethical responsibility through maximum vertical integration

With 100% “Made in Germany”, we also guarantee our customers the highest standards in data protection, cybersecurity, and ethical responsibility. With high quality and short supply chains, we also ensure – almost incidentally – sustainability and environmental protection. From our prestigious headquarters in the centre of Regensburg, Dallmeier not only carries out its own research and development but also the complete manufacturing process – from component to product to solution.
