

Innovative Solutions for Secure and Trusted Access

Get to know **COMINFO** — manufacturer of latest-technology **access solutions**. 30+ years of experience. Based in Czechia.

At **Security Essen**, we present our **speed gate** product range, **solutions for paid access**, and tripod and full-height **turnstiles**. All the products are suited to specific requirements and individual security measures of various market segments.

EasyGate SUPERB – the World's Slimmest Speed Gate

We are exhibiting the world's slimmest fully-equipped speed gate. **Minimal dimensions and maximal security. Sleek and elegant design that can be fully customized to meet the client's requirements.** Ideal access solution for office buildings or government institutions.

Advanced and Customizable Speed Gates

The exhibited **EasyGate speed gate range** comes in several models featuring different security levels, design characteristics, and product finishing.

We place the **utmost importance on aesthetics and intuitive visitor guidance**, ensuring that our products blend harmoniously into the overall architectural picture and efficiently streamline people flow within the customer's property.

Our speed gates can be manufactured in nearly **any color and finish**. We will **seamlessly integrate all the required technologies** and **illuminate the speed gates in company colors**. In short, we tailor our solutions to individual needs regarding function, technologies, and design.

Paid Access Solutions and Additional Products

We are also showcasing solutions for paid access, **a convenient way to make customers' premises both secure and profitable**. It is ideal for managing access to toilets and public conveniences (gas stations, shopping centers, and public transport stations).

"As seen in several of our installations, the return on investment in COMINFO paid access solutions ranges just in a few months," adds Jakub Vicik, Marketing Manager.

To illustrate the variety of COMINFO access solutions, our booth at Security Essen also presents our full-height turnstile REXON ERA and BAR ONE tripod turnstile.
