Security Essen 2022:

## Press conference

### Product Preview

**Balzwerk UG** shows its security furniture 2.0. Here attractive design furniture comes together with safes as hard as steel and bedside cabinets or a dresser to provide secure storage for jewelry, watches or other items that need protecting.

When used on a mobile phone, **Plegium's** smart pepper spray will automatically send an emergency call to notify a registered contact. Additional security is provided by an integrated siren and an LED stroboscopic light.

**Salto Systems** will demonstrate how your mobile phone becomes the key. The new mobile access solution makes it possible to assign individual access rights.

The 3D AIR by **TBS Touchless Biometrics Systems** is an innovative fingerprint scanner that delivers an accurate 3D scan. The solution ensures extremely high accuracy and the highest level of security.

The mailroom screening "Mailsecur" is a real innovation in detecting hazardous materials in mail. Unlike conventional X-ray machines, the compact table-top device detects not only objects but also liquids, powders and surface-treated paper. The product can be seen on the joint stand of the **Unival Group** and **Wisag**.
