

# IOPEDAL

The multi-functional accelerator tuning

Product features:

- ✓ 4 customizable driving modes for enhanced throttle response and driving behavior
- ✓ Remote Controlled - Flexible and intuitive operation
- ✓ Auto-Ranging-Function for individual tuning
- ✓ Improved security with secureMode & valetMode
- ✓ Simple Plug & Play Setup: No expertise required
- ✓ App available for iOS and Android

Developed and designed by

**IOTUNING**

# REMOTE CONTROL

## Flexible and intuitive operation

- ✓ Clear optical feedback with RGB-LEDs
- ✓ Flexible mounting position - Bracket and fastening material included
- ✓ Wireless remote controlled - No additional cable connection

# IOPEDAL

# DRIVING MODES

## **trafficMode**

Unfamiliar terrain or too much traffic? With this mode you can take it easy. The reaction of your accelerator pedal is less sensitive, especially when starting off. Your stress level will thank you.

## **ecoMode**

With a few tricks you can save fuel and money. This driving mode helps to reduce the average fuel consumption of the car when the rules of eco-driving are observed.

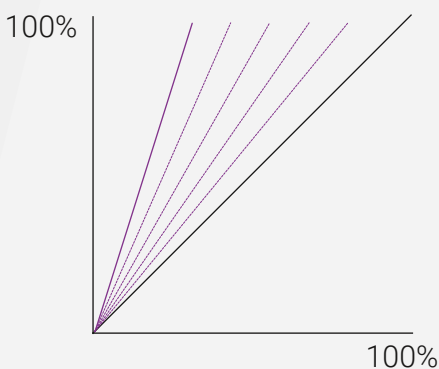

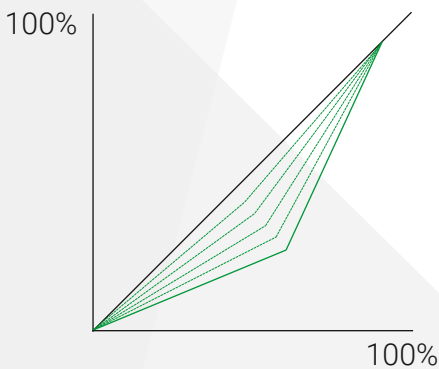

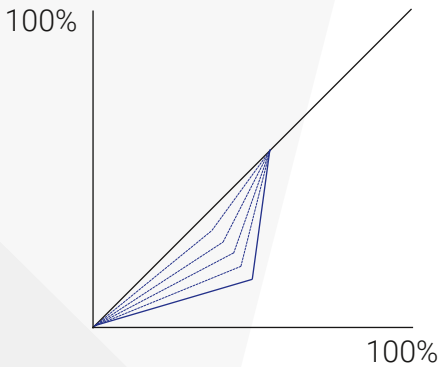

## **sportMode**

With this driving mode, your vehicle reacts with a significantly better response behavior and a straighter acceleration. The response time of the engine is significantly improved. Discover the hidden potential and fall in love with your car all over again.

## **xtremeMode**

When sportMode doesn't quite cut it and you're looking to push boundaries, step it up with xtremeMode.

*Every driving mode comes with the versatility of 5 unique sub-programs for tailored performance.*

# ADDITIONAL FUNCTIONS

## secureMode

Engage this mode, and upon your next start, the accelerator pedal will be inactive. A simple press on any key of the remote unlocks it. Add this swift and straightforward anti-theft measure to your vehicle.

## valetMode

Unsure about entrusting your vehicle to a valet or a less experienced driver? Simply limit its power. With this mode, you can restrict the range of your accelerator pedal.

## Auto-Ranging-Function

The IOPEDAL features a smart calibration function. Upon installation, it analyzes all vital data from the accelerator pedal and crafts an optimized, individual map. Consequently, each driving mode is automatically tailored to the unique map of the accelerator pedal.

The IOPEDAL offers a variety of captivating features and configurations:  
• With 'Flavor Select', choose from over 60 unique sub-programs.

## Benefits for dealers:

- ✓ All-in-one system for analogue, SENT and PWM signals
- ✓ Wiring with plug connection for more flexibility
- ✓ No vehicle-specific programming required
- ✓ Attractive and fair-trading margins
