

**ozparts**<sup>®</sup>  
automotive - performance

## ABOUT US

Ozparts is a logistical and sales platform that focuses on the distribution of high-quality Australian & US automotive components in Europe. Thanks to over 14 years of experience with joint logistics, warehousing and sales we provide synergies and economies of scale to both manufacturers and customers.

The company was established in 2008 with the main aim - to make it easier for European customers to purchase imported brands while cutting transport costs and time. Long experience with logistics and distribution in Europe enables us to offer our customers competitive shipping rates with reliable and fast shipping conditions as well as a wide range of automotive products so they can combine their orders. Ozparts main warehouse is strategically located in Poland (Toruń). In 2017 we established a second warehouse in UK - Birmingham to service local customers.

## OUR BRANDS

**WE OFFER SIMPLE SELF-SERVICE ORDERING SYSTEMS...**

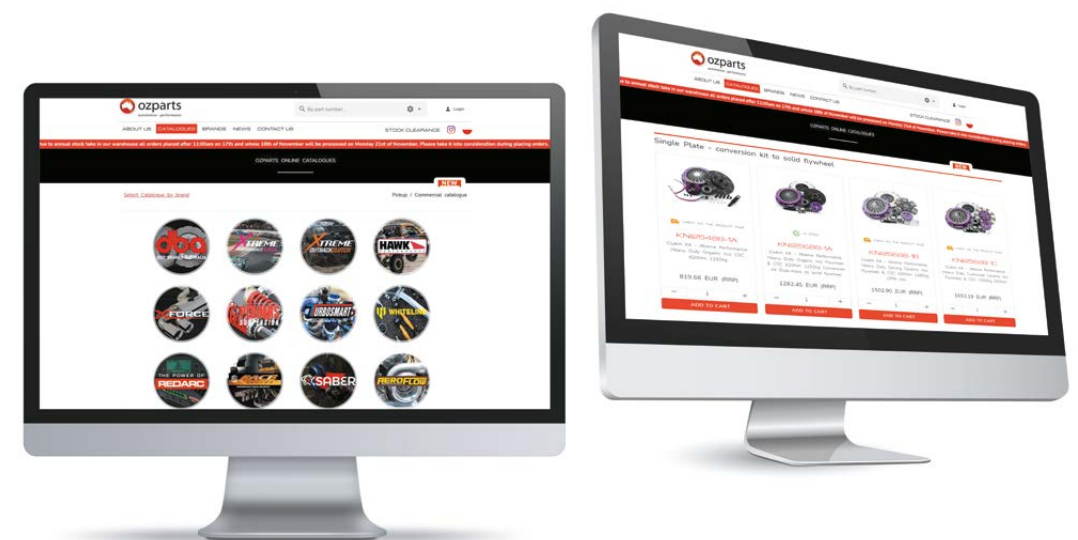

**Our customers have access to online system providing with:**

-  Trade only online shop
-  24/7 Online ordering system
-  Online catalogues
-  Ozparts stock levels
-  Products in transit
-  Manufacturers' stocks
-  Alternative shipping options
-  Additional settings and tools to automate processes
-  Access to product and marketing data
-  Easy online returns system

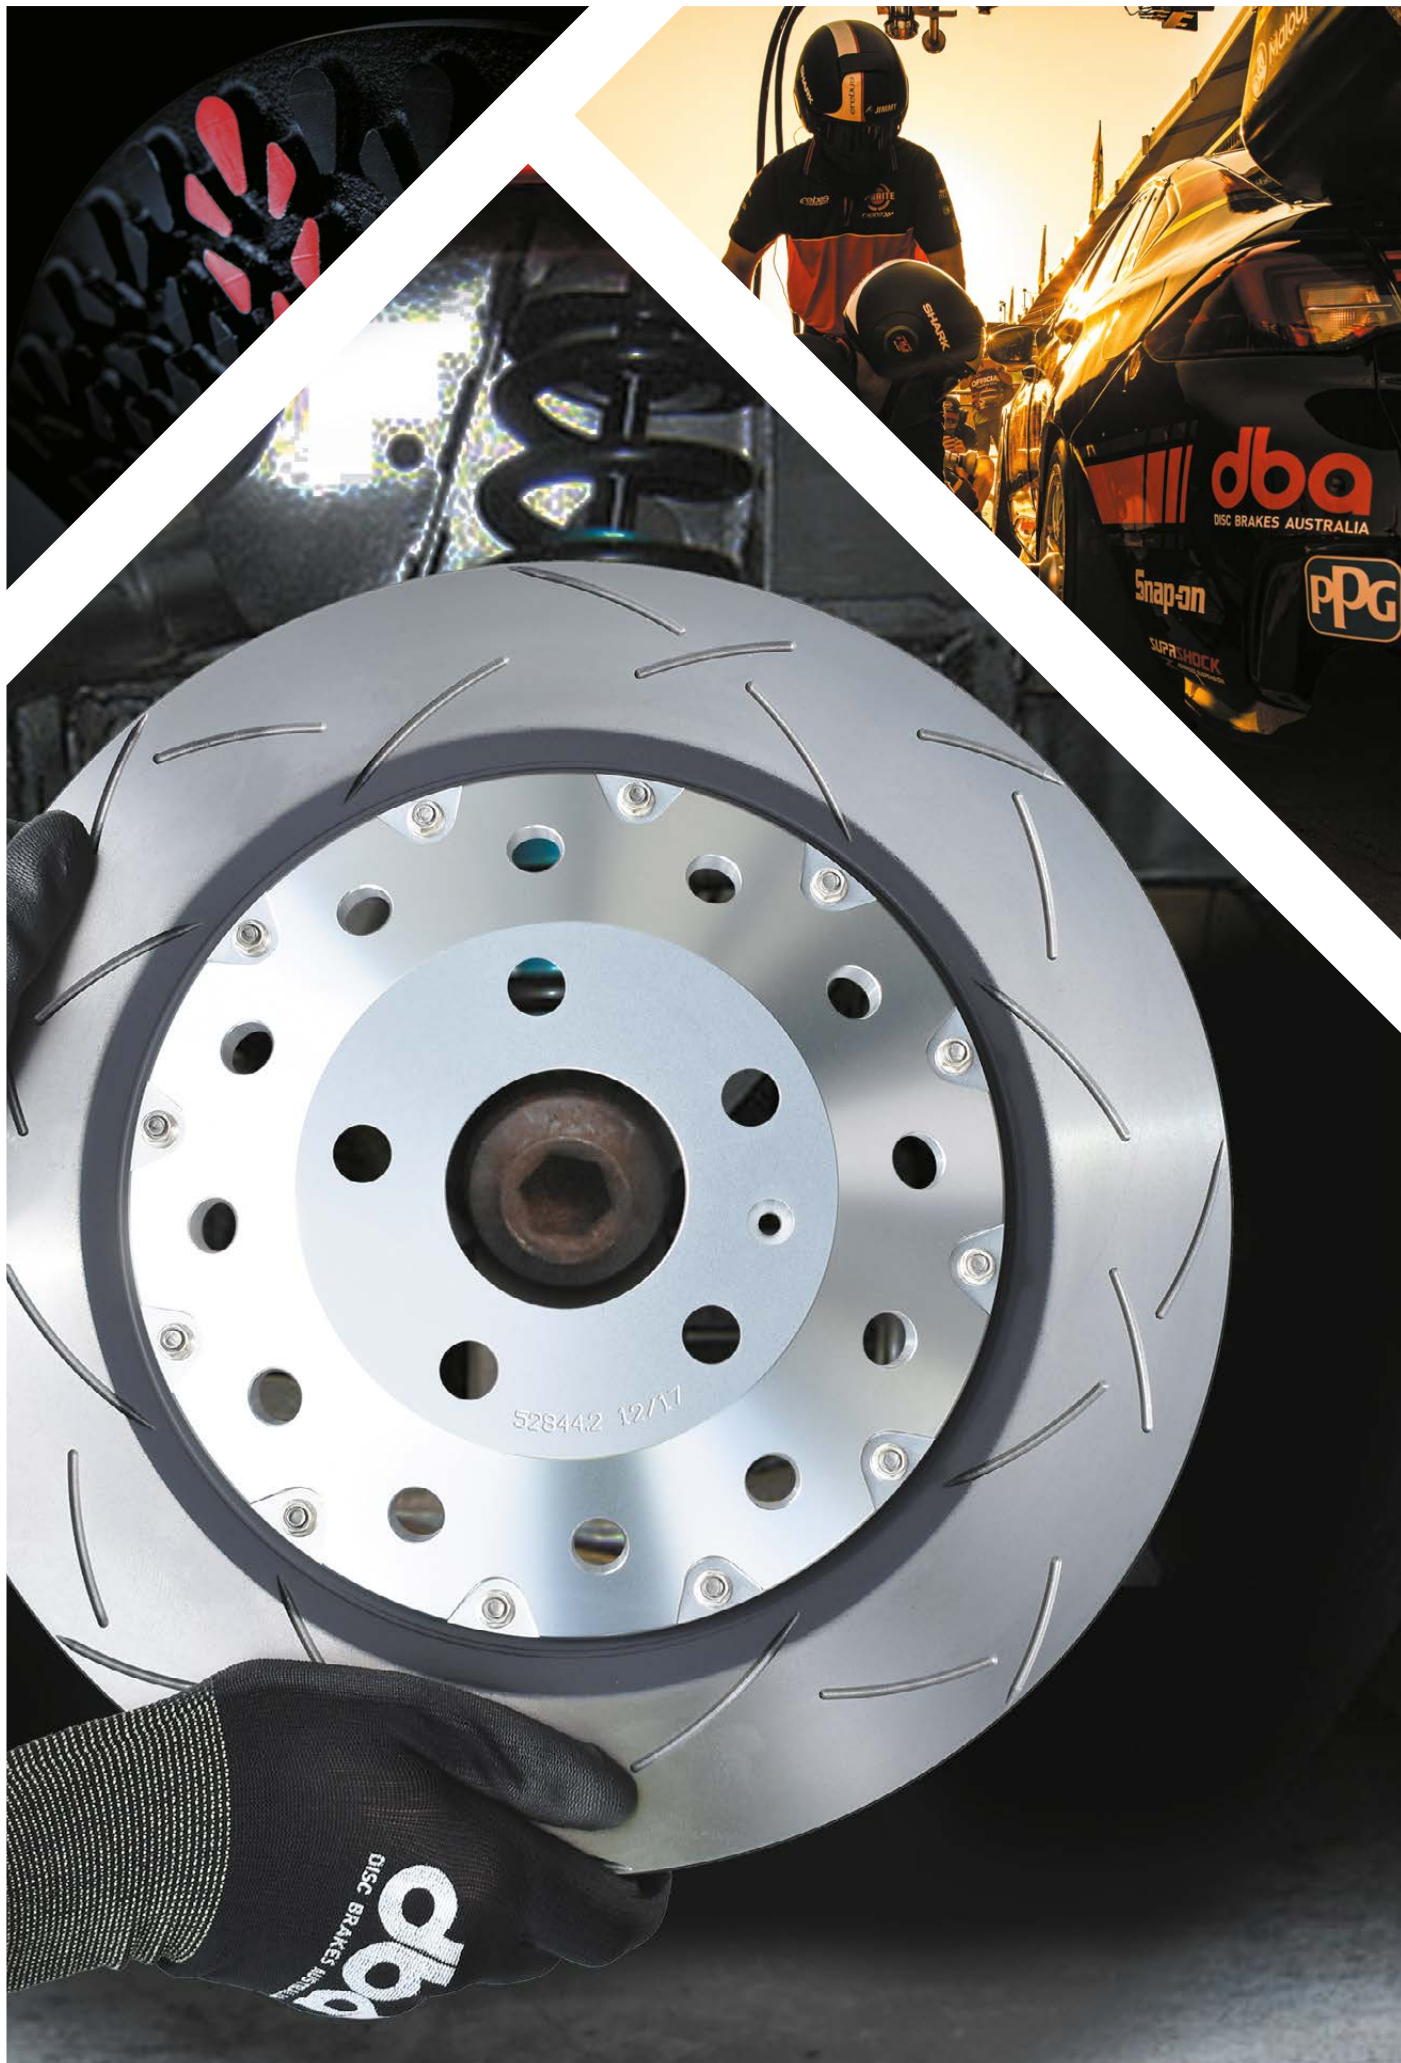

The system enables to order products directly at agreed discount level and drop-ship it to chosen destinations.

**...AND STRONG SALES AND AFTERSALES SUPPORT**

We do not only sell unique and high-quality products. Our services include also complex sales, marketing and aftersales support that help us build long term cooperation with our customers.

## DBA DISC BRAKES AUSTRALIA

Disc Brakes Australia is an Australian owned manufacturer, designer and global marketer of after-market and OE disc brake rotors, drums, rings, hats, nuts and brake pads. DBA has grown from its humble beginnings as a family-owned business over 40 years ago to being Australia's number one disc rotor manufacturer and complete 'brake solution' supplier. Since 2018 DBA has been owned by ASX-listed GUD Holdings Limited, one of Australia's leading conglomerates of automotive aftermarket product brands.

### Brake rotors

DBA offers three distinct rotor categories that cater to each segment of the market Street Series is designed for daily driving OE replacement braking. 4000 Series are for those who seek an upgraded braking performance and 5000 Series is for those who seek high performance braking in a two piece rotor design.

#### STREETSERIES

- Original Equipment Upgrade
- Protective Coating/Paint
- Better Heat Dissipation
- Improved Pedal Feel

#### 4000SERIES

- 4x4 & On-Road Performance
- High-Carbon
- Better Heat Dissipation
- Thermal Stability Profiling
- Tghp Temperature Management

#### 5000SERIES

- Two-Piece Rotor Technology
- High-Carbon
- Better Heat Dissipation
- Thermal Stability Profiling
- Tghp Temperature Management

### Brake pads

Our pad range is the result of an exhaustive research and development program, having put these pads through their paces on the street, off-road, at the racetrack and our extensive testing equipment.

#### STREET SERIES

- OE replacement & everyday use
- Passenger cars & SUV's
- Light commercial Vehicles
- Use with DBA Street Series Disc Rotors

#### STREET PERFORMANCE

- OE upgrade
- Performance cars, SUVs & 4WDs
- Use with DBA Performance Disc Rotors

#### XTREME PERFORMANCE

- Performance street cars & track use
- High GVM towing, heavy off-road use
- Use with DBA Performance Disc Rotors

## XTREME PERFORMANCE CLUTCH

The Xtreme Clutch name has become synonymous with high performance. Xtreme has earned its reputation as Australia's largest manufacturer and stockist of clutch kits and components.

Your Xtreme Clutch has been professionally engineered and developed as a brand new product resulting in a clutch that exceeds application requirements for performance, wear and driveability in the long term.

### STAGE 1 - ORGANIC - SINGLE PLATE

Recommended for:  
**Lightly Modified Street Vehicles**

Available in 4 different configurations, stage 1 organic kits offer a significant increase in performance and torque capacity while maintaining excellent driveability.

### STAGE 2 - CERAMIC - SINGLE PLATE

Recommended for:  
**Motorsport Applications**

These kits are available with sprung or sprung / cushioned ceramic friction discs and are designed for motorsport applications where higher heat and torque capacity is required. These can also be used in some road applications.

### STAGE 2R - RACE CERAMIC - SINGLE PLATE

Recommended for:  
**Motorsport Applications**

Stage 2R kits feature a sprung ceramic friction disc, but with even greater clamping force pressure plate for higher torque capacity. These kits are recommended for use in motorsport applications only.

### STAGE 3 - CARBON

Recommended for:  
**Motorsport Applications Requiring Very High Heat Capacity**

The Xtreme Clutch Stage 3 kits include a carbon friction disc and are recommended for very high power motorsport applications that require exceptionally high heat capacity. These kits are recommended for motorsport use only.

### MULTI-PLATE

Recommended for:  
**Very High Horsepower Street & Motorsport Applications**

Xtreme Clutch offers a wide range of multi-plates both organic and ceramic kits including twin plate organic upgrades for very high-performance road applications and twin & triple plate ceramic kits for motorsport & drifting purposes. As a complement to the offer, Xtreme has 184mm motorsport multi plates racing kits for 1000+HP Time attack cars.

## XTREME OUTBACK

Xtreme Outback is a market leader in the development of Heavy Duty and High Performance clutch systems in Australasia. Extensive research and development facility allows Xtreme Outback to continually analyse new friction materials and evaluate spring rates to obtain an optimal combination for performance, noise suppression, and durability.

### STAGE 1 - HEAVY DUTY SPRUNG ORGANIC

Recommended for:  
**Vehicles with minor performance modifications, are daily driven but also used off-road and vehicles that tow regularly.**

The stage 1 heavy duty organic clutch kit provides excellent driveability along with an approximate 15-40% increase in clamp force (application specific). These clutch kits are mainly used in street vehicles with larger wheels or performance upgrades as well as vehicles that are regularly used off-road or tow at the limit of their tow capacity.

### STAGE 1X - EXTRA HEAVY DUTY SPRUNG ORGANIC

Recommended for:  
**Vehicles with significant performance modifications, are daily driven but also used off-road and vehicles that tow regularly.**

The Extra Heavy Duty range of upgrades from Xtreme Outback are designed to offer the highest levels of performance for heavily modified street and off-road vehicles. These kits offer a significant increase in clamping force (30-60% above the factory clutch) over the stage 1 equivalents and are designed specifically for vehicles that have had significant aftermarket tuning and performance upgrades.

### STAGE 2 - CERAMIC SINGLE PLATE UPGRADES

Recommended for:  
**Motorsport Applications**

Xtreme Outback Stage 2 Ceramic upgrades have been designed to offer the ultimate in heat capacity for single plate upgrades and are designed specifically for motorsport applications such as endurance rally events and time trials. Available in Sprung Ceramic and Cushioned Ceramic, there are a wide variety of options to choose from depending on the vehicle use.

### STAGE 2R - HIGH CLAMP FORCE CERAMIC UPGRADES

Recommended for:  
**High Torque Motorsport Applications**

Stage 2R kits are sprung ceramic single plate upgrades like seen in the „Stage 2“ kits, however these kits offer even further clamping force for vehicles that have had significant performance modifications. Used regularly in motorsport applications, these kits are ideal for competition cars still used on the road (such as rally cars).

## HAWK PERFORMANCE

Hawk Performance is a leading supplier of severe duty and high-performance friction products manufactured in ISO-certified facilities for the motorsports and performance automotive aftermarket. Decades of experience in developing friction materials for aerospace, industrial, military, automotive and motorsports applications give Hawk Performance an advantage over the competition.

### STREET CARS

American muscle cars, tuners and European touring sedans can officially be pushed to their limits with confidence, thanks to proven engineering and superior components.

#### HPS 5.0 HIGH PERFORMANCE STREET COMPOUND

- The premium replacement for American muscle cars, European touring sedans and tuners
- PC Performance Ceramic LUXURY AND TOURING STREET COMPOUND
- Clean, quiet and quick stopping power with uncompromising performance

### TRUCKS & SUVs

Today's SUVs and heavy-duty trucks aren't yesterday's station wagons and pickups. Added weight and stress require smarter friction technology.

#### LTS LIGHT TRUCK/SUV COMPOUND

- A better way to stop your light and full-size trucks, vans and SUVs
- SD SUPER DUTY TRUCK COMPOUND
- High fade resistance with superior high temperature and high inertia capabilities for heavy towing

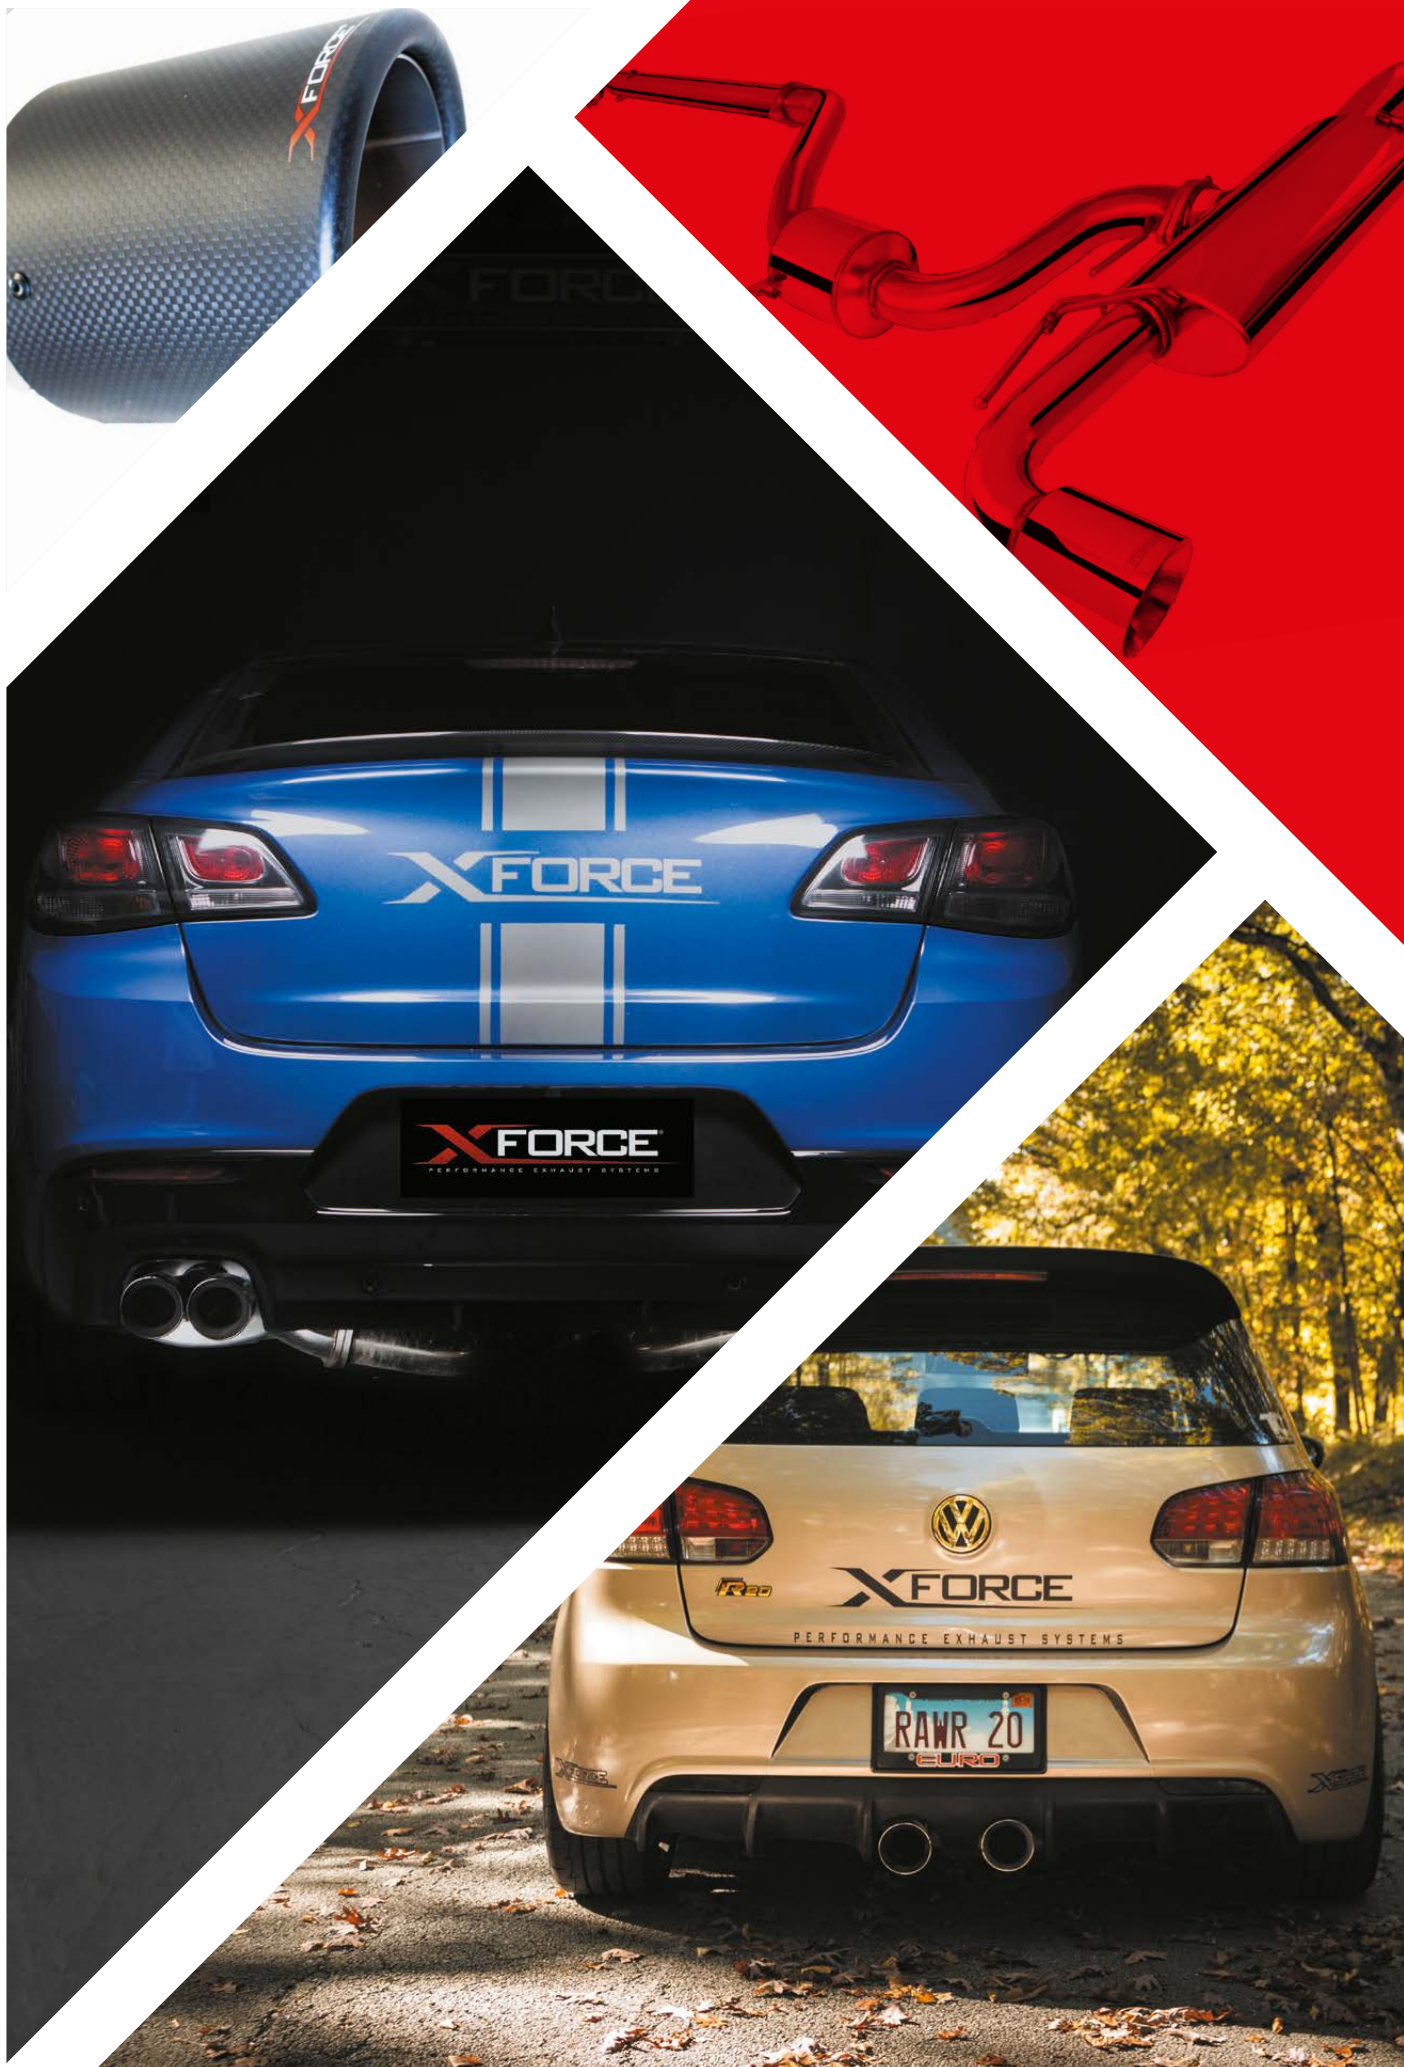

### MOTORSPORTS

Whether you chase times on road courses, circle tracks, dirt tracks, drifting or autocross, we have the proven motorsports brakes that best fit your racing environment. Hawk Performance has been the brand of choice for top teams and championship drivers for more than 25 years. We offer compounds that outperform the competition in every setting, exceeding the demands of temperature and torque to shave time and deliver the win.

#### HP Plus AUTOCROSS AND TRACK DAY COMPOUND

- For autocross, Solo II and track day events
- DTC DYNAMIC TORQUE CONTROL COMPOUNDS Unbeatable race friction products that disperse and dispel energy in any race
- HT-10/BLACK/BLUE 42 MOTORSPORTS RACING COMPOUNDS

**XFORCE**

XFORCE focuses strongly on research and development which ensures that their diverse range of exhaust products are of powerful engineering precision, stylish and practically designed to maximize performance and most importantly, technically innovative such as our patent VAREX™ Muffler application which in itself, is an exhaust revolution.

**VAREX®Exhausts**

Varex® mufflers use our patented\* technology to combine both the design of the stock muffler and the performance muffler into one single compact unit. A sophisticated butterfly valve mechanism is implemented to redirect the exhaust gas flow and vary between the two. For higher sound level, the exhaust flows are directed through the opening path and produce maximum power with a robust sound level (or the "sports car note") and near-zero resistance.

**VAREX®Smartbox**

Varex Smart Box is a control device with patent-pending technology that lets the user to manually and automatically adjust the exhaust sound level of the Varex exhaust.

The connections between the Smart Boxes and the smartphones are via the latest Bluetooth® technology, which provides an exceptionally reliable and smooth user experience.

## **PEDDERS SUSPENSION & BRAKES**

Pedders is Australia's Number 1 producer of a comprehensive range of products and services for all suspension, braking, towing, load carrying and steering needs to suit passenger cars, four-wheel drives, light commercials and high performance vehicles. For each new chassis, Pedders develops an integrated and engineered suspension solution.

Pedders TrakRyder 4x4 Product Range includes thousands of quality 4WD suspension parts, brake parts and more that have all been designed to improve the ride and handling characteristics of specific 4WD vehicles.

### **The range includes:**

- Shocks & Air Bags
- Coil & Leaf Springs
- Brake Pads & Rotors
- Big Front Brake Kits
- Rear Disc Conversion Kits
- Torsion Bars & Suspension Bushes
- Shackle & U Bolt Kits
- Alignment Kits
- Steering Dampers
- Adjustable Panhard Rods
- CV Shafts & Swivel Hub Seal Kits
- Plus a host of additional ancillary products

## TURBOSMART

Turbosmart is one of the world's leading manufacturer of turbo accessories. An ever-increasing number of racing teams and tuning houses around the world use and recommend Turbosmart products. Their achievements on the track and at street events are a testimony to Turbosmart's design, manufacturing and testing principles.

### EXTERNAL WASTEGATES

The Turbosmart Range of External Wastegates is the largest in the World! The GenV includes options such as Standard (3-26psi), Motorsport (Additional Heat Sink) and Co2 (Compressed Gas), HP High Pressure (10-50psi) and of course, our Award-Winning Electronic Range!

### BLOW OFF VALVES

Turbosmart's Kompact Range upgraded valves suit road cars for standard, high performance and tuned use. The Turbosmart Kompact blow-off valve Range includes the Kompact EM (Electro-Mechanical) series, which takes the best mechanical valve reliability and integrates factory control electronics and strategies. Furthermore, the Kompact Range relies on Turbosmart's proven positive seal piston. The boost-balance system for years of reliability and trouble-free motoring.

### WASTEGATE ACTUATORS

Turbosmart internal Wastegate Actuators are designed and manufactured in Australia from billet aluminum and feature stainless steel rods & fasteners, a proprietary Silicon Nomex diaphragm, and are available in a huge range of vehicle-specific, turbo specific as well as universal applications. The architecture of this range is based on Turbosmart's experience in External Wastegates and is more than capable in the most demanding environments.

### BOOST CONTROL

Turbosmart's eBoost range of electronic boost controllers gives you the ultimate control over your boost curve. Turbosmart electronic boost controllers allow you to control three individual characteristics of your boost by adjusting three easy-to-set parameters: The maximum boost pressure (set point), The spool-up rate of the turbocharger (wastegate pressure), and the reaction time of the controller (sensitivity).

### FUEL PRESSURE REGULATORS

Turbosmart Fuel Pressure Regulators are available in a range of specifications based on fittings sizes and fuel pump flow potential. It is critical to have a regulator which will flow and bypass enough fuel to cope with the supply from your pump and do so while maintaining perfect fuel response for your naturally aspirated, or forced induction engine. Turbosmart's unique control technology results in the fastest responding & most accurate regulator available.

### ANTI-LAG VALVES

Fresh Air or Bypass styler Anti Lag Valves redirect high-pressure air from the compressor around the engine and direct it to the turbine manifold in closed throttle situations. This Air, combined with a genuine anti-lag control strategy will ensure maximum turbine shaft speed is maintained and ultimately, ensure your turbo stays on boost, ready for you to open the throttle.

## WHITELINE

### What makes Whiteline different?

Unique Products - Whiteline is the only brand globally to market a full range of under car chassis and suspension components that complements your spring and damper/ shock absorber set up. Simply, it is a tuned system and not a collective of various brands. We provide sway bar & lowering springs solutions. Browse through our different products online to find the best that suit your needs.

**Activate more grip** - Engineered to activate more grip for improved handling and outright performance, Whiteline products are rigorously tested on the track to provide unrivalled street performance!

**No compromise** - Advanced designs, material technologies and extensive testing ensures minimal effects on ride quality and maximum effects on handling precision.

**Solutions** - From automotive repair workshops to race teams, Whiteline offers proven product solutions to suspension and handling problems for many of the worlds vehicle platforms

### OUR VERSION OF STABILITY CONTROL!!!!

#### Whiteline's range of products includes:

- Adjustable Sway Bars, Stabilizer Bars or Anti Roll Bars - The best "value for money" handling improvement you can make, with adjustable kits also available.
- Chassis Control Bushings - Our „Engineered Elastomer Bushings" feature the quality ride of rubber at lower speeds and at higher speeds react when under cornering, accelerating and braking loads, for CHASSIS CONTROL and improved handling.
- Camber & Toe Kits - Proper camber adjustment is essential for tyre wear and performance where proper toe adjustment can transform turn-in from "passive" to „alive".
- Caster Kits - There's almost no such thing as too much positive caster for performance driving.
- Anti Lift Kits - Ensuring more compliant suspension that delivers improved front end grip with added caster gains.
- Roll Center & Bump Steer Correction Kits - Designed to reset the front roll-center geometry and bump steer settings on performance and lowered vehicles.
- Strut and Chassis Bracing - In regards to performance you can never have too much chassis stiffness.

## ACL RACE BEARINGS

ACL has a proud & rich history in Motorsport. The ACL RACE Series performance engine bearing range of today has a strong pedigree in motorsport & traces its roots back to the 1960's with the manufacture of engine bearings for use in the world conquering Brabham Formula 1. Further experience in the Australian Supercars Championship & numerous other race codes.

### Features of ACL Race Series performance engine bearings:

#### PRECISION MANUFACTURING

ACL Race Series performance engine bearings are manufactured to exacting tolerances. Micron tolerance machining supported by precision measurement systems delivers consistent accuracy to key characteristics like wall thickness and crush. This ensures reliable fit and helps maintain consistent clearances.

#### BEARING MATERIAL ENHANCEMENTS

A blend of characteristics to provide high strength and crankshafts. excellent seizure resistance. No flash plating is applied to further improve bearing retention and maximise heat transfer.

#### BEARING DESIGN ENHANCEMENTS

##### Crush increased for:

Improved bearing retention from higher radial contact pressure. Locks the bearing into the housing. More effective heat dissipation through improved thermal transfer.

##### Bearing Eccentricity

**Definition:** Gradual reduction in wall thickness between the crown and parting line.

ACL Race Series performance engine bearings feature increased eccentricity to increase improve shape adaptation to compensate for bore distortion at high speed operation.

Assists in the formation of hydrodynamic oil film.

##### Main Bearings with Extended Grooves

Full (180o) grooved uppers with matching partial groove in lowers.

- Reduces interruption to big end oil supply.
- Tapered groove run-out.
- Smooths big end supply cut-off avoiding pressure pulsing and cavitation.

##### Enlarged ID Chamfers

Accommodate larger fillet radii on performance crankshafts.

## REDARC

REDARC Electronics designs, manufactures and provides patented, reliable and fully-integrated, portable, vehicular power solutions. REDARC has over 35 years' experience in the research, design, development and manufacture of a range of electronic voltage converters and associated products, inverters, power supplies and battery chargers.

### BATTERY MANAGEMENT SYSTEMS

Never find yourself with a flat battery ever again with REDARC's state-of-the-art battery management system, the Manager30. Designed to charge and maintain the auxiliary batteries used in recreational automotive and marine applications, these battery chargers incorporate AC, DC and solar inputs to achieve the best charge.

### CHARGE EQUALISERS

REDARC Charge Equalisers are designed to manage a high current 12 volt supply in a 24 volt vehicle. REDARC Charge Equalisers allow 12 volts to be 'tapped' from the centre of a series-connected, two battery, 24 volt DC Electrical system while still ensuring an equal charge across the two batteries.

### DC POWER SUPPLY

REDARC's DC power supplies keep your appliances, equipment and devices powered up no matter where your adventure takes you. With an output power range varying from 12 to 24 volts, these voltage converters can provide a constant, regulated power from an input of 9 to 32 volts.

### DUAL BATTERY CHARGERS

Compact in size, easy to install and suitable for 12 or 24 volt vehicle systems, REDARC's dual battery chargers work with either standard voltage alternators or smart alternators.

### FUSE KITS

REDARC fuse kits use only the best quality fuses and fuse holders designed to fit the cable required for the specified current and make a solid connection, giving you peace of mind that your installation is working efficiently and safely. REDARC offers fuse kits in 40A and 60A versions designed for BCDC installations and a 100A version designed for SBI installations.

### JUMP-START DC BATTERY CHARGING KIT

REDARC's jump start ready dual battery kit is the perfect setup for people wanting to charge auxiliary batteries and have peace of mind in case of start battery failure.

This dual battery setup offers everything you need if you're looking to run things like fridges, inverters and other 12v devices. While the jump start capability means in the event that your start battery is advertently discharged, you have the ability to easily jump start your vehicle at the push of a button.

### SMART BATTERY ISOLATORS

REDARC's Smart Start (SBI) battery isolators prevent your secondary battery draining your main battery, so you can stay out on the road for longer. Microprocessor controlled, this dual battery isolator is designed to protect the start battery from excessive discharge while allowing the auxiliary battery to supply charge to non-essential loads.

## **SABER**

Saber test all of its products to their limits and beyond.

The vast majority of the gear is tested to destruction in a NATA (National Association of Testing Authorities) Lab. Saber also takes its gear into the real world to make sure it will work in the harshest conditions that can be found. Saber products meet all applicable standards and are always labelled accordingly.

## **SOFT SHACKLES**

Soft Shackles are a unique solution designed to help you reduce the amount of metal involved in a recovery situation. Soft shackles have been in use for a number of years in other industries and Saber Offroad has worked hard to create shackles designed for the demands of the 4WD industry.

## **ROPES**

Unlike the traditional snatch strap a Kinetic Recovery Rope is essentially made up of 2 separate components. The outer sleeve is designed to take the abuse that is often given to these types of recovery devices.

## **RECOVERY KITS**

Saber Offroad 4WD Recovery kits have been created to ensure that you will have everything that you need when you are performing your next recovery.

## **REAR RECOVERY HITCHES**

The rear recovery hitch slots straight into a standard 50mm rear tow hitch and unlike most, is designed specifically for use with Soft Shackles.

## **EZY-GLIDE RECOVERY RINGS**

When size and weight are serious factors in recovery kits, we are proud to offer this heavy-duty, small and lightweight alternative to a snatch block.

## **ALUMINIUM SPLICED WINCH THIMBLES, ALUMINIUM FAIRLEADS**

To create a safe winch recovery scenario you need a number of good quality components, all designed to work together in harmony.

## **ALLOY WINCH SHACKLE**

The Alloy Winch Shackle is a lightweight alternative to a traditional Winch Hook. Made from strong, lightweight 7075 alloy, it will comfortably stand up to the harsh conditions at the front of your vehicle. To further strengthen it, we put the finishing touches on with a coloured Cerakote ceramic coating.

## **AEROFLOW PERFORMANCE**

Aeroflow Performance Products, were created by car enthusiasts, for car enthusiasts. Since 2010, Aeroflow Performance Products has grown to design and manufacture close to 11000 exceptional quality products. Fittings and hoses, fuel system components, air and oil filters, oil systems, silicone hoses, fabricated tanks, alternators, workshop tools and much more.

Aeroflow Performance has a comprehensive product range for the Global Market for Hot Rods, Drag Racing, Speedway, Street Machines, JDM, Sport Compact Racing, Road Racing, Rallying, Tractor Pulling, Off-Road Racing, Motorcycles and Marine markets.

### **Product range:**

- Air Filtration
- Apparel & Promotional
- Brake Hose, Fittings and Accessories
- Cooling, Insulation and Air Conditioning
- Electrical Accessories and Gauges
- Engine Components and Accessories
- Fabrication, Exhaust, Alloy and Stainless Bends
- Fuel System, EFI and Accessories
- Hardline and Fittings
- Hose and Tube
- Hose Rnds, Fittings and Adapters
- Kryptalon Hose and Fittings
- Oiling System and Accessories
- Racing and Safety Accessories
- Silicon Hose
- Speedway Components
- Tanks
- Tools and Shop Equipment
- Transmission, Shifters and Driveline
- Turbos, Nitrous and Supercharger Accessories
