

INX International is the third largest producer of inks in North America, with full-service subsidiaries in Europe and South America, and is part of Sakata INX's worldwide operations. As the leader in metal decorating ink technology, INX helps designers, brand owners, and metal decorators achieve high-quality decorating on metal packaging. Our performance-proven ink systems are formulated for a full range of specialized packaging, including 2-piece, three-piece, and monobloc containers in both conventional and UV technologies.
