

A Leading Company and Privileged Partner for the Design, Engineering, Fabrication and Installation of Machines and complete Plants for the Manufacturing of Drums, Gas Cylinders, Large Storage Tanks and Other Metal Forming Machines

Drums Manufacturing Equipment

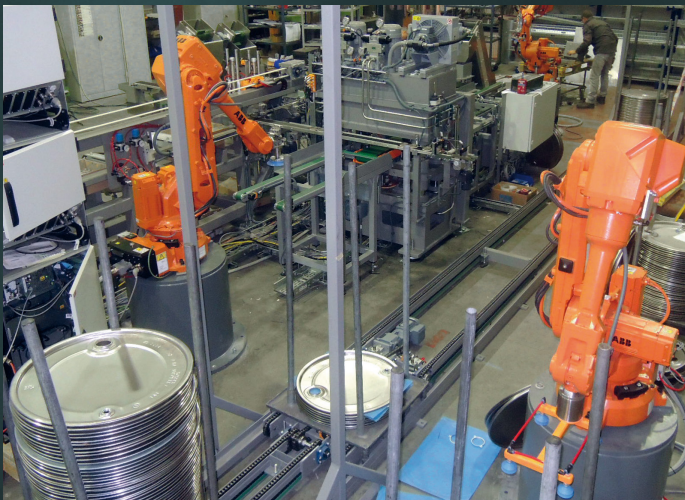

Finishing of Drums

Paint caps applicators, Drum spray booths for outside painting and inside lining (open or closed, water wash or dry filters, single or multiple drum rotating systems), Ends spray booths for outside painting and inside lining (open or closed, water wash or dry filters Ends rotating equipment, Drum aligners & conveying systems for ovens, Silk-screening of drum bodies and drum tops.

Ends Manufacturing

Decoiler, Straightener, feeder, Stagger blanking/drawing press, Scrap shear, Automatic discs feeding, marking presse, End Precurling & sealing, Seal ring automatic placing, Automatic flanges insertion, Automatic ends stacking & destacking systems.

End of Line

Automatic paint caps removal and sorting systems, Plugs screwing equipment, Inkjet marking systems.

Other Equipment

Chains, roller & belt conveyors, overhead conveyors, Loading, unloading, hanging & handling systems, Lifting tables, Turn-over systems.

Recon Drums

Deheading, Trimming, Expanding, Seaming, Necking-in, Chime rolling machines, Dedenting and body rolling.

Drum Bodies Manufacturing

Decoiler, Straightener - feeder, Cut-to-length, Sheet stacking & destacking, Power guillotine, Sheet edges' grinding - brushing machine, welder upstream & downstream equipment, Tapering, Flanging, Curling, Beading-Whoops, Corrugating, Necking-in, Automatic ends feeding system for seamer, Seaming, Leak tester (soapy water, differential pressure, helium), Drum up-ender & down-ender.

500+ installations in over 75 countries - Since 1905
