

Managing your
packaging needs

The need of the hour

The right packaging. It's what gives a product the competitive edge. Especially in these times when products are vying for consumer attention. Today's battles are fought in the shop windows. 'Visual appeal' counts. Every time. It's also the success factor behind many-a-brand.

Enter Scan Holdings

Here's where Scan Holdings can help. To drape your product in the right packaging. That will set your cash registers ringing.

Scan Holdings is one of the leading packaging companies, spread across five continents. Catering to the packaging needs of the beverage / beer and food industries. Our products are used for packing a large variety of products like tuna, meat, fruits, vegetables, instant coffee, nuts, tobacco, milk, fruit juice, beer and so on.

Established in 1995, the company swiftly dominated the packaging markets with its competitively priced quality products. Today, with resourceful avenues of global sourcing, Scan Holdings has an extensive range of international quality packaging products to offer.

The company is spearheaded by a young team, which has the right expertise and experience to service its customers in every part of the world. Thus the team has also successfully introduced several innovative products to the world of packaging.

But that's not all! Apart from packaging products, Scan Holdings offers instant coffee powder in different blends and has launched popular brands like 'you & me' and 'Café heaven'. It is also a leading supplier of premium quality Cocoa Butter and Cocoa Powder in the country.

With clients spread over Asia, Africa, Australia, Europe and South America, Scan Holdings has developed a good reputation for dependability, quality and the range of products that it offers, and for its service excellence.

Neck Foils for beer bottles / Aluminium Neck Foils

- The attractively printed Aluminium Neck Foils for beer bottles are shipped across to major breweries for global beer brands
- Special Inks can be used to highlight key portions in printing
- It is also possible to enhance certain printed areas (like company logo or specific text) that will become visible only when the beer is chilled
- Foils can be supplied in customised shapes and sizes as per requirement

Paper Labels for beer bottles

- Beer Bottle Paper Labels are offered in all kinds of papers, be it wet strength, metallised, laser or plastic
- Use of Special Inks like metallic and temperature variation allows highlighting of key portions in Label thereby enhancing the look and improving the brand image
- Labels printed in client specific designs on state-of-the-art German machines. Can be delivered in desired shape and size
- High quality Labels not only add aesthetic value but are also an important safeguard against fake products

Speciality Papers

- Vegetable Parchment Paper
- Tracing Paper
- Bleach Kraft Paper
- Glassine Paper

Committed to partnering

At Scan Holdings, growth is a continuous process. For it is a company committed to value added services. Value additions in sourcing, in quality, in service and in innovation.

Therefore, Scan Holdings builds strong relationships, with its clients and its business partners. Relationships that grow with time. Scan Holdings is the company to be with, for all packaging needs, for all time to come.

Our Vision

At Scan Holdings, our vision is to be a high quality packaging producer that helps its customers add value to their products. We wish to constantly partner with our clients in developing concepts that add brand value and sales for our customers and convenience for the final user of our packaging. Our actions should bring success for our clients, wealth creation for our shareholders, growth for our suppliers, professional and personal comfort for our employees and a sense of belonging with the communities by always keeping Scan Holdings' core values top of our mind.

Our Mission

To partner with the world's best; so that above vision can be achieved through providing superior products at competitive costs to our customers; providing opportunities to our suppliers; providing a healthy and prosperous environment to our employees and associates and paying back the society and nature from whom we are taking always.

Core Values

Our company believes that Success in business and relationships can be achieved by practicing three main principles:

Honesty + Hard Work + Commitment = Success

- Honesty with Customers, Partners, Suppliers, Associates, Employees and the Society.
- Hard Work to be put in all thoughts and actions of the Company with integrity, sincerity and intelligence.
- Commitments made must be maintained. Scan assures and expects that any commitment is well considered, because once made it must be met.

Expansion Plans

Scan Holdings has acquired approximately 43.5 acres (175,000 square meters) of prime industrial land in the state of Gujarat, India. Gujarat is the fastest growing industrial state in India. Its investor and industry friendly policies, world class infrastructure and dynamic leadership have made it a favoured destination in Asia Pacific region. It boasts of several sea-ports on its 1600 km coast line that facilitate import and export of raw materials and finished goods. Scan Holdings plans to build several packaging factories on this land over next few years. These factories are aimed at providing world class packaging to the food, beverage and other industries in the region. It will further encourage those food companies to invest into India, who have been hesitating so far due to lack of availability of right packaging for their products. At the same time, we will allow select food companies to set up filling lines next to our packaging lines thereby enjoying the benefit of improved quality at lower cost. A forward looking step which will not just help Scan Holdings, but revolutionise the whole industry in coming years.
