Trade fair for sanitation, heating, air conditioning and electrics

SHK+E ESSEN becomes a meeting place for drinking water

Trade fair offers attractive participation packages for players in the water industry

Companies from the sanitation sector can also present themselves at the upcoming SHK+E ESSEN from March 19 to 22, 2024 without much effort and at top conditions. The Drinking Water Meeting Point in Hall 6 of Messe Essen offers all participants their own presentation area on a visually highlighted joint stand. The attractive participation package includes stand rental including stand construction, basic equipment and advertising services. In addition, exhibitors can help shape the technical supporting program in the stand's own Speakers Corner. Interested parties from the water industry can find the registration documents at www.shke-essen.de.

"The requirements for the supply of safe drinking water have steadily increased in recent years, for example due to climate change or the issue of energy efficiency and hygiene. The need for information in the trade and in building planning is correspondingly high. At SHK+E ESSEN, exhibitors can present their innovative solutions and products to an inquisitive specialist audience," explains Volker Meyer, Managing Director of figawa e. V., which is a partner of the Drinking Water Meeting Point.

The focus is on water meters and metering as well as water treatment

The topics on the common area include water meters and metering, water treatment and the disinfection of drinking water and drinking water installations. Laboratory services and expert opinions, measurement and analysis technology and legionella prophylaxis will also be covered. Corrosion protection, pipelines and fittings will also be on show. The exhibitors who have registered so far include Grünbeck Wasseraufbereitung, Hans Sasserath and Klinger.
