Trade fair for sanitation, heating, air conditioning and electrics

## Ticket sales for SHK+E ESSEN start

Around 300 exhibitors present their market-ready innovations at the trade fair

SHK+E ESSEN will take place at Messe Essen from March 19 to 22, just in time for the start of spring. Around 300 exhibitors from 17 countries will be presenting their new products and services at the trade fair for sanitation, heating, air conditioning and electrics. This is a unique opportunity for HVAC professionals to find out now about the building technology they will be installing for their customers tomorrow. Tickets for the first industry highlight of the year are now available at [www.shke-essen.de](http://www.shke-essen.de). A regular day ticket for the trade fair costs 22 euros; trainees, pupils and students pay just 12 euros.

"The industry has more than a year behind it with many upheavals initiated by politicians. At SHK+E ESSEN, manufacturers present their solutions and the attractive supporting program offers updates on the implementation of new requirements and regulations in practice," explains Frank Hehl, newly elected Managing Director of the SHK NRW trade association, which is the conceptual sponsor of the trade fair. Project Manager Torben Brinkmann adds: "The strength of SHK+E ESSEN is its proximity to the industry. We know what the professionals from the trades, planning and architecture are interested in. At the moment, these are primarily cross-sector solutions for the efficient integration of heat, electricity and mobility - with the heat pump as the starting point - as well as efficient installation technologies, which is why we are offering them a particularly large amount of space."

## Five halls with the building technology of tomorrow

SHK+E ESSEN is divided into the areas of heating technology, ventilation and air-conditioning technology and electrics (Halls 1 and 3) as well as sanitation installations, water technology and sanitation objects (Hall 6). There will also be innovation and information (Hall 2) as well as tools, operating equipment and mobility (Hall 2 and Galeria). In addition to the offerings of the major manufacturers, visitors can look forward to several specialist forums on the topics of education, digitalization, drinking water and the future of building technology. These are joint

stands and lecture areas where trade fair visitors can find out about the most important trends in the industry in an efficient and compact way.

SHK+E ESSEN opens Tuesday to Thursday from 9 am to 5 pm and on Friday from 9 am to 3 pm. For optimum preparation, we recommend taking a look at the website ([www.shke-essen.de](http://www.shke-essen.de)) with an up-to-date list of exhibitors and further information on the range of products and services and the program. Under "My trade fair", visitors have the opportunity to create an individual watch list of interesting exhibitors. In addition, inquiries can be sent to exhibitors via the matchmaking tool before the trade fair in order to arrange appointments. To make the visit even more efficient, the visit planner suggests an individual route through the halls.
