

Essen, March 16, 2023

The trade fair for professional cutting technology from April 25 to 27

Cutting World: Innovative cutting solutions at Messe Essen

German Cutting Congress will take place at the same time

A wide variety of products and services awaits trade visitors at Cutting World 2023. Around 50 national and international exhibitors will present their products and services from April 25 to 27 in Hall 8 of Messe Essen. The product ranges extend from cutting technology and operating materials, through processing and contract manufacturing, to control software, artificial intelligence as well as services, training and further education and research.

Among the exhibitors are numerous well-known companies in the industry - among others, 247TailorSteel, AIR LIQUIDE, Boschert, ESAB Welding & Cutting, Expercut, Hypertherm, IHT Automation, Lantek, Maximator Jet, Mecanumeric, Messer Cutting Systems, SigmaNEST Systems, STM Waterjet, TECOI and Zinser will be presenting themselves at Messe Essen. Trade visitors will thus experience the entire process chain of the cutting industry.

German Cutting Congress under the motto "Trends in the Cutting Industry"

The German Cutting Congress will be held in the adjacent congress rooms parallel to the trade fair. With their ticket to Cutting World, visitors also have access to this. They can find out about the latest developments and trends in the cutting industry in over 30 expert presentations. The main focus will be on the topic of digitalization. What advantages can it bring companies? This is explained by Dr. Ing. Patrick Herwig from the Fraunhofer IWS Dresden in his contribution "Clever cutting and reducing costs - process sensor technology and AI as a way to maximize quantity and quality".

Further information on the trade show at www.cuttingworld.de and information on the congress on the homepage of the [German Cutting Congress](http://www.german-cutting-congress.de).
