

# Aqua meter SUS·tee<sup>®</sup>

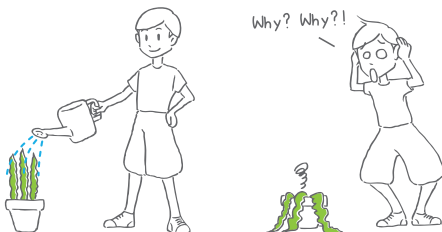

reddot award 2014  
winner

GOOD DESIGN  
AWARD 2015

MADE IN  
JAPAN

Trouble with plant watering?

Sometimes too wet? Sometimes too dry?

Let SUSTEE tell you when to water! It's so easy!

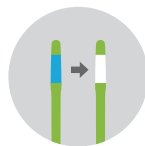

1 Set

Insert SUSTEE into the soil at the base of a potted plant in between the two ▼▲ markings.

2 Water

It will change color from white to blue within 20 to 30 mins after watering.

3 Monitor

Blue ▶ enough water in soil  
White ▶ in need of watering

Choose between 3 sizes according to the diameter of your plant pot:

**S**

ø < 3.5in  
ø < 9cm

**M**

ø 4.1 – 7.1in  
ø 9 – 18cm

**L**

ø > 7.1in  
ø > 18cm

SUSTEE works with all kinds of soil types and plants.

SUSTEE is not just any aqua meter. Without relying on batteries, it measures the moisture level in the soil using pF-Value that is suitable for all kinds of plants including orchids, succulents, house plants. Moreover, SUSTEE is made with 100% recyclable parts and can be reused by replacing its inner core with refills.

How long can SUSTEE last:

The table on the right shows the average lifespan of SUSTEE in different types of soil as tested. Depending on the bacterial content in the soil, the depletion rate may vary.

Type of Soil	Average Lifespan
Organic culture soil	About 6 to 9 months
Inorganic soil	About 9 to 12 months
Hydroculture	About 1 to 2 years
Bog moss / Bark	About 1 to 2 years
Peat Moss	About 1 year
