How to store our products

PP and PS :

- Two box-pallets maximum can be stored on top of one another.
- Keep the boxes in a dry environment.
- Do not store plastic containers near a heat source.
- Store our products out of direct sunlight: UV exposure can degrade plastics and make them brittle.
- During winter months it is preferable to store containers inside and at a temperature above 10°C before using them. Plastics become brittle under negative temperatures. This characteristic is reversible when temperature rises again.

Bio-sourced material :

Bio-sourced material are sensitive to changes in temperature and level of hygrometry. In order to avoid deformations and destacking problems, we recommend to use the products shortly upon receiving them and to store them inside in a cool and dry place. We will not be able to take back goods that have been damaged by improper or extended storage.

OUR 2021-2022 NOVELTIES

 All new products for the coming year are presented on the following pages and are highlighted in orange together with our orange novelty logo in the relevant tables.

EOLE : AN ECO-FRIENDLY BOWL

Ref : 3223 / 3227

Eole 23 and Eole 27 combine the perfect design for plant production (three-tier base and optimal drainage) with an eco-friendly conception through lightweight while maintaining a good rigidity.

The loading of the shelf is optimised with 15 bowls/ CC shelf

Available in 4 Cyclos-certified colours

(See page 74)

FUJI 17, A NEW HIGH SHAPE CONTAINER

Ref : 2520 / 2521

Fuji 17 is the first size in our new range of high shape containers, offering an optimal solution for logistics purposes. This series is of course fully adapted to automation and offers a perfect drainage thanks to its three-tier multi-hole star-shaped base. Labelling is possible either by using one of the four G2 label slots or by thermo-sealing a label on the high rim of the container.

Available in 2 versions (with or without label slots) and 4 colours (Black 01 / Terracotta 17 / Grey WD / Taupe WE).

(See page 53)

0.52 L VX POT : NEW IN OUR V ROUND POT SERIES

Ref : 2214

New 10.5 cm pot with 4 label slots. Three-tier multi-hole base adapted to all types of irrigation (overhead, drip or sub-irrigation). Shiny easy-to-clean surface.

It will soon be possible to equip this pot with IML (In-Mould-Labeling).

Do not hesitate to contact us for further information.

Available in Black 01 and Terracotta 17

(See page 54)

ADDITION TO OUR SX RANGE : SXC 2.5 L G2

Ref : 6236

A 2.5L container has been added to our SX range. Available in black and Terracotta 17, as well as in Grey WD and Taupe WE.
(See page 47)

NEW 3 L V M SQUARE ROUND CONTAINER, FOR USE WITH BARK-SPREADING MACHINES

Ref : 2244

SOPARCO holds the largest range of «square-round containers» on the market.

The new 3L VM completes the collection of «square-round» pots specially designed with a round base in order to be compatible with the use of bark-spreading machines.

The range is now available in 2, 3 and 4L.

This container saves up to 14% space compared to a 3L round pot.

(See page 56)

Scan here
for more information

NEW TRAY FOR 4 POTS OF 15 X 15 CM

Ref : 8739

SOPARCO continues to develop its range of transport trays. This product is designed for use with the 3L high shape square round container (ref. 2247).

(See page 35)

OUR 2021-2022 NOVELTIES

SAVE TIME WITH OUR 13 CM SOPAFIX V

Ref. 3917

We have again enlarged and improved our Sopafix® range with a new version of 13 cm Sopafix designed for a quick and easy destacking thanks to the V-system.

This feature also saves time when placing the Sopafix on the pot.

Its narrow top diameter makes it easier to place the pots in trays.

Available in boxes and box-pallets.

(See page 30)

Scan here for more information

NEW DIVIDABLE 2XCM4 FACP* VEGETABLE TRAY

Ref. 4759

This new vegetable tray can hold 12 to 24 soil blocks of 3.5 x 3.5cm. The pre-cut middle part between the trays is strong enough to permit handling with forks.

This product is equipped with G2 label slots.

34 trays per CC shelf.

(* FACP = mesh bottom/solid sides)

(See page 23)

SOPACLIP PTU FOR BEDDING PLANT TRAYS

Ref. : 3976 / 3968 / 3967 / 3977

The SOPACLIP range is designed for use with our bedding trays.

The two legs are clipped into the G2 slots of the trays while the upper part maintains and protects the plant during transport. These four new references for GM6, GM10, PM6 and PM10 trays complete the existing range.

(See page 25)

WHY USE PLASTIC POTS ?

INNOVATION
FOR
growing

As early as 1985, SOPARCO has adopted an Eco-responsible approach in every industrial process and in new product developments. Our extensive know-how both of the horticultural market and of the plastic industry enables SOPARCO to design and develop high-quality products with the minimum environmental impact: eco-design, use of recycled or bio-sourced materials, active approach towards the circular economy. In close cooperation with national and international organizations responsible for the implementation of plastics waste recovery solutions, SOPARCO intends to demonstrate the ecological added value of plastics in a sustainable production process.

➤ Because it fits perfectly the requirements of professional plant growers :

Light yet durable products

Nearly endless possibilities of shapes to answer a wide range of technical requirements (*such as multi-tier pot base, reliable label slots...*)

Automation of production

High resistance to weather conditions

Easy storage

Easy customization of the products
(*pot colour, printing of the pot, use of IML ...*)

Affordable material

▶ To promote the circular economy

Plastic is one of the easiest material to recycle (**)

Soparco keeps adapting its range in order to comply with European environmental regulations.

Our aim is to offer products that can be recycled after use to meet the objectives of the upcoming European targets for plastics in a circular economy.

100 % of our products are recyclable

Thermoformed ranges : made from 100% recycled material

Injection-moulded ranges : made from 80% to 100% recycled material

Many products are now also available in Post-Consumer Recycled Material in several colours.

All the pigments we use comply with the REACH regulation.

Our standard colours (except Black 01) are NIR detectable. This enables their sorting in waste-collection facilities which means they can then be recycled.

SOPARCO works with major waste sorting actors to enhance the effective recyclability of plastics in the context of the circular economy.

In France, these partnerships have resulted in the implementation of the « HORTI-ECO » system. This system is based on the recovery of used pots in order to recycle them. *Please contact us for more information.*

**Source : Resources, Conservation and Recycling - Volume 105, Part A, Pages 186-197

➤ To limit the carbon footprint

Recycled plastic helps
minimize

the products' carbon footprint compared
to alternative materials known to date (**)

Weight reduction of our products while maintaining their mechanical properties.

Use of injection-presses with low-energy consumption.

Rationalisation of logistical aspects of our products (square round range, trays...) to limit the carbon footprint of transported plants.

100% recycled material

In addition to a low carbon-footprint, our industry also uses very little water.

**Source : Resources, Conservation and Recycling – Volume 105, Part A, Pages 186-197)

TO BE ENVIRONMENTALLY RESPONSIBLE IS ALSO...

To recycle the majority of waste induced by our industrial activity (paper, cardboard, ink-cartridges, production scraps, waste oils....)

To work with environmentally-conscious transport companies (using lorries to EURO 6 standards which insure the reduction of CO2 emissions)

To reduce the weight of our packaging (cardboard boxes, packaging films) and to use recycled material for our packaging (boxes, pallets)

To print our catalogue on PEFC-certified paper

OUR THERMOFORMED RANGES

► Glossary

PP : polypropylene

PS : polystyrene

PCR : Post Consumer Recycled Material : recycled material originating from household waste or end-of-life products.

PIR : Post Industrial Recycled Material : recycled material originating from industrial waste.

Recyclable : capacity of a material to be recycled for the production of another product.

Detectable : capacity of a material to be detected by infra-red lights on the sorting equipment of waste-collection centres in order to be separated from other materials thus enabling it to be recycled.

AND BIO POTS ?

Soparco's BIO-FIBRA range offers an alternative to growers who are looking for a different eco-friendly approach.

▶ BIO FIBRA*

100%

Bio-sourced material containing wood fibre, recycled PLA and a plant-based binding agent.

0

component containing oil-based carbon. The cellulose-based fibers are by-products from industries using PEFC-certified wood resources.

Recycled
PLA

comes from the recycling of products originating from European food-processing industries.

100 %
in accordance
with TÜV environmental
requirements.

*BIO-FIBRA is a bio compostable material complying with the EN-13432 standard and is certified by TÜV.

The composition of this bio-sourced material has been developed to minimise the impact on the environment and to avoid competition with human and/or animals food resources.

Today, a pot is no longer just a growing tool. It becomes a way to create value and to stimulate the act of purchase. **For these reasons, we offer a complete range of Marketing Solutions** which enable to improve the visibility of the products and enhance the productions.

- **Ready-to-go products** (Carrying handle: p. 17)
- **Promotion products** (PM2+: p. 21)
- **Ready-to-use products** (deco containers : p. 60 - 62, window boxes : p. 69 - 73, hanging baskets : p. 74 - 78 and bowls : p. 79 - 82)
- **Customization** (labels, printing, colour, label stakes: p 13 to 17).

► Products labelling

Simple black printing on white label or full-colour customized label printing, we adjust our labelling solutions to your needs. We are equipped to label all our containers (injected pots or thermoformed pots) with labels developed according to your needs (barcode, QR code, logo, plant passport, etc.)

- Waterproof and UV proof label
- Black or coloured printing on a white background
- Standard size: 24 x 40 mm (Other sizes available, please ask us)

FOR MORE INFORMATION

▶ PRINTING

PRINTING

For those who wish to customize their pots, printing is a really efficient marketing tool. Today, we are able to meet your expectations thanks to different printing processes. Our sales team will advise you on the best method according to your needs.

▶ Flexography and Offset printing

Flexography printing: this process enables to make a full-colour printing with photographic quality. This technique consumes little ink and is therefore environmentally-friendly while offering a great quality rendering

Offset printing : Offset printing : this printing process gives quality results with a very precise print frame and a durable print. We can print 1 to 4 colours:

- Printing fees : personalised quote on demand.
- Delivery time : Please ask us for lead time.
- 300 dpi .eps or .pdf files are required.
- If our contribution is necessary, the time spent will be charged additionally.

Flexography

Offset

▶ Silkscreen printing

High quality printing on injected round or square pots.

Contact us for any request.

► IML printing (In-Mould Labelling)

With this technology, a pre-printed polypropylene label is placed inside the mould before injecting the material. Label and container become one.

The advantages of this process are numerous:

- High-quality print.
- Unlimited choice of colours.
- Possibility to print « square-round » pots including in the label slot recess.
- Ecological solution: Container and label consist of the same material (polypropylene) and can therefore be fully recycled.

Different products can be printed. Contact us for any request.

Required files: 400 dpi (minimum 300 dpi) in .eps, .ai or .pdf format with vectorized texts and logos.

Please contact us for price and delivery time.

2L VM square-round container IML (2229) available in stock for perennials (only in French)

► Off-the-shelf printed pots

We keep stock of standard printed pots
“Les aromatiques faciles” for herbs on our DUO 10.5cm
(ref.4432)

Do not hesitate to contact our sales team for further information.
Only available in French.

Non contractual photograph

MARKETING SOLUTIONS

► Colours

Our colour range allows you to make many associations between the container and the plant. It's one of the easiest way to enhance your productions.

We keep a close eye on the new colour trends and we work with recognized trend agencies.

We offer the largest off-the-shelf colour range of the market and a great flexibility to develop bespoke colours.

REACH REGULATION
ALL THE PIGMENTS WE USE COMPLY
WITH THE REACH REGULATION.

► The attachment system

Bedding trays and several Soparco containers are provided with an attachment system. You can easily place labels, carrying handles and label stakes in order to set up your marketing solutions. The Soparco labelling system is explained below:

C : Clip

Curved slots at the end of the bedding plant trays.

F : Slot box

The curved slot is placed in the bottom of the slot box.

G : Slot with teeth

Slot with 8 mm teeth and more. The 4 teeth are inside the box.

Face view

G2 : Slot with teeth

G2 (new model)

Slot with 7 mm teeth and less.

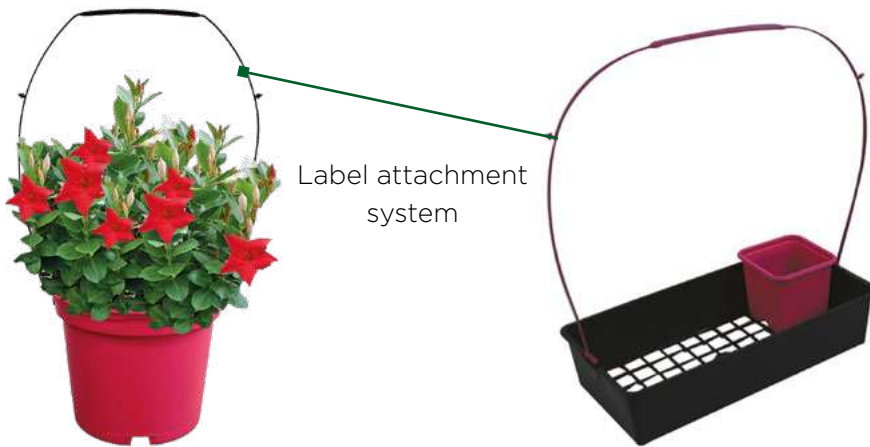

Face view

CARRYING HANDLE

BIO THERMOFORMED RANGE:

Soparco's bio range of thermoformed containers are manufactured using mainly bio-sourced materials. Due to a minimal carbon footprint the production of this range lends itself to optimised sustainable development. The materials used are biologically compostable, according to the EN-13432 Norm, as certified by TÜV. The production process of these containers has been designed and tested in house. This range is compatible for use in existing irrigation and production systems designed for use with conventional plastic containers. (Do not plant with pot) **(See advice on storage p.3)**

DUO® BIO FIBRA 5° LOW

• Biologically compostable pot

• Do not plant with pot

SX: A GLOBAL SOLUTION FOR ALL YOUR PRODUCTIONS

AN «ECO-FRIENDLY» CONTAINER

The innovative research and highly technical manufacture of the SX container highlight the eco responsible SOPARCO policy through:

- The reduction of material weight while maintaining good mechanical characteristics.
- The use of presses with low energy consumption for manufacturing.
- The use of fully recycled materials for the production of black and some colours.
- High opacity for optimal root growth.
- Minimal carbon footprint.

THE ART OF DETAIL

3 Tier bottom:

- Geometry of the bottom providing a perfect substrate aeration.
- 25 evenly distributed holes in order to ensure an optimal drainage.
- Improved drainage due to star-shaped drainage system.
- Central post, in contact with the ground for a good stability of the bottom and optimal drainage.

- 
- Rim and shoulder designed for maximal rigidity.
 - Excellent de-stacking.

- 
- 4 G2 label slots : Fixing system developed for a perfect fixing of the labels, carrying handles...

- Wide shoulder permitting easy transport with forks.

LABELLING SOLUTIONS AVAILABLE (P13)

PRINTING AVAILABLE (P14-15)

COMPATIBLE WITH CARRYING HANDLE (P17)

ADAPTED LABEL HOLDER (P17)

FITTING SOPAFIX® AND SOPACLIP® (P30-31)

SX

4 G2 label slots
(ref 6216, 6221, 6236, 6246, 6266,
6276, 6286, 6291)

- Multilevel bottom with star-shaped drainage system
- Eco-friendly containers
- Matt and silky surface
- Attractive colours

FUJI

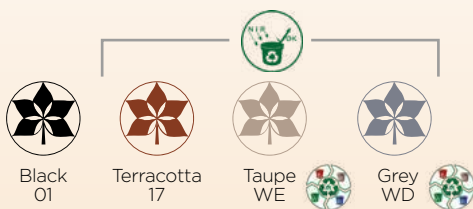

- High shape to optimise plant transport on CC trolleys
- Large and angular shoulder to facilitate transport with forks
- A label can be fixed on to the pot thanks to the label slots or by thermo-sealing it on the high pot rim.
- Matt and silky surface

Its high rim makes it possible to thermo-seal a label
(Available with or without G2 label slots)

Three-tier multi-hole star-shaped base to provide an excellent drainage and a perfect substrate aeration.

WORKING TOGETHER WITH GROWERS FOR HALF A CENTURY

For more than 50 years, SOPARCO has been constantly investing and innovating in order to develop and support horticulture. Our industrial family-owned French business is built on true values: listening, proximity, expertise, service, and protection of the environment.

SCAN HERE
FOR MORE INFORMATION

With a head office in France and well established in Europe, we offer cost effective and original solutions to growers worldwide.

A tailor-made service

Our staff of over 200 works in two SOPARCO production sites (Sablons-sur-Huisne near Chartres and Chaingy near Orléans), and in several commercial subsidiaries in Spain, Germany, the Netherlands and the UK. A 24/7 production enables SOPARCO to offer approx 600 models and 2000 references of pots, trays and plastic accessories to meet the technical, logistical and commercial requirements of nurseries and pot & bedding plant growers. In addition to our standard range, we can adapt our productions to meet our specific needs (special colours, customization: printing, IML, labelling).

We listen to you

Our field sales team and our multi-lingual sales administration work together to offer the best suitable products & service.

Innovation in favour of the environment

We regularly invest in our industrial equipment to incorporate the very latest technological innovations and reduce the environmental impact of our production process. At SOPARCO, innovation embraces horticulture and nursery trends. Eco-design and environmental protection are at the heart of our innovations and developments. We are actively engaged in the development of a circular economy. (see page 7 to 12)

Quality products and logistics

We place great importance in the selection, analysis and control of recycled materials to offer you reliable products. Our logistics department offers optimal delivery times thanks to a high storage capacity (30,000 sq meter) and an extensive network of transport partners. The majority of our catalogue products is available from stock all year round.

Think know-how... Think SOPARCO
