

STATEMENT OF CARBON NEUTRALITY

*Red Lands Roses PLC
2020*

January 2022

Subject of Declaration

The subject of this statement includes all activities under the Redland Roses operational control, covered under Scopes 1, 2 and 3 of The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition) as detailed within this report.

This statement is compatible with international standards ISO 14064 and PAS 2060.

Carbon Neutrality

Carbon neutrality refers to achieving net zero carbon dioxide emissions by balancing emissions with carbon removals (i.e., carbon offsetting). This is important as it allows global balancing of emissions while emissions reduction strategies are being implemented.

Why is Carbon Neutrality Important?

To avoid the worst effects of climate change, we need to take responsibility for our impact and act now to limit global temperature increases to 1.5 degrees Celsius, or well below 2 degrees Celsius above pre-industrial levels.

As set out in the Paris Agreement, offsetting plays an important role in rapidly deploying environmental solutions where it is economically most viable. This helps to bridge the gap between now and the time our societies will be able to phase out Green House Gas (GHG) emitting technologies.

In that respect, the Paris Agreement aims to accelerate the transformative change needed to reach carbon neutrality, ensuring that countries around the world will be increasing their ambition and action over the second half of the twenty-first century, while also supporting the achievement of Sustainable Development Goals.
