Ambella® *Pink*

Ambella® Pink: Atmospheric and long-flowering

Give your garden, patio or house a colour boost with the brand new Ambella® Pink by Addenda®. This intense pink Campanula immediately makes your space warmer and more atmospheric, especially when you combine it with other Ambella colours. It is an easy-care plant that flowers almost all year round.

Just add love + biodiversity

Addenda tries to contribute to biodiversity with Bee-friendly campaigns for Campanula and Hebe. The garden and patio plants from Addenda attract many bees and butterflies due to their nectar-rich flowers. The bees are in grave danger, there is massive bee mortality worldwide and this is a major threat to our food chain. The main cause of this is lack of food.

When you put Campanula or Hebe in the garden, the bees and butterflies will automatically start coming thanks to the insanely high concentration of nectar. Because the plants flowers repeatedly, for a long time and multiple years, bees are assured of food from March to October. It's a win-win; your garden blooms beautifully and you help the bees.

Addenda® POS Just add love

Make your Campanula or Hebe Addenda display attractive in your garden center or shop and inspire your customers to create biodiversity in the garden. If you choose Addenda, you will be rewarded with beautiful and very strong plants, available in many colours and pot sizes. All they need from you is a splash of love!
