

Dive into the enchanting world of our palms  
to discover the beauties of nature.

# COCO PALM PLANT

INTRODUCING

[www.cocopalmlant.com](http://www.cocopalmlant.com)

# STARTING

Our steps that show respect for nature not only reflect the beauty of our flowers but also embody our commitment to leave a clean world for future generations.

To fulfill our responsibility of preserving nature, we carefully manage our production processes. Our goal is to adopt a sustainable business model, efficiently utilize resources, and minimize environmental impacts.

## ABOUT US

As a family engaged in the ornamental plants sector from the past to the present, we have decided to specialize our production activities based on our industry experience and academic knowledge. Focusing particularly on outdoor ornamental plants, we have aimed to expand our operations by specializing in the *Chamaerops Excelsa* (*Trachycarpus fortune*) variety of palm trees. In 2013, we initiated *Chamaerops Excelsa* cultivation and production in Bursa Mustafakemalpaşa under the name "Coco Palm Plant."

Our commitment is to contribute to a sustainable world for future generations, and to achieve this, we are increasing our production capacity while continuing our efforts. This specialization has allowed us to thoroughly understand the unique characteristics and care requirements of *Chamaerops Excelsa*. As a result, we have enhanced our ability to provide customers with high-quality and customized care.

As Coco Palm Plant, we prioritize eco-friendly practices and manage our production processes in a sustainable manner. This not only fulfills our responsibility to preserve nature but also enables us to offer environmentally friendly products to our customers.

Keeping a close eye on industry developments, we aim to grow our business and reach a wider audience by prioritizing customer satisfaction. Throughout this process, we plan to establish strong communication with our valued customers, enrich our product range, and emphasize our commitment to sustainability at every opportunity.

We take pride in our efforts to leave a green touch on the future and aspire to be a quality brand in the world of ornamental plants. We are excited to continue working diligently to add value to our customers and business partners.
