WELCOME TO CPI

BIO.AGRI®

Coconut Product Impex is a leading manufacturer Exporter of Coir products established during 2006. We manufacture a wide range of Coir Products used for the Horticultural, Gardening, Landscaping, Erosion control and Industrial sectors. Our production Centers are strategically located in India, where the proximity of quality natural Coconut fiber and coco peat is in plenty, which are taken into our production process. Due to our locational advantage in major coconut processing areas we are enriched with best possible Coconut fiber and coco peat in the world for our wide production line.

Coconut Products Impex have adhered in the production of novel products by incorporating innovations in accordance with the periodic changes. We are maintaining uncompromised observance of quality standards and strict delivery schedule. Managed by a team of highly motivated and professional management and staffs, we are dedicated in ensuring best possible products and services to all our valued customers according to their specifications and demand.
