CYKLOP GLOBAL PACKAGING

Cyklop UK Limited is a subsidiary of Cyklop International, a worldwide producer and supplier of packing systems and materials. Backed by our products and expertise, we offer our customers optimal solutions for load securement during internal and external transportation, where the emphasis is on the safe and sound transport of goods. We offer solutions tailored to the market: hand-held tools, machines and systems, consumables especially designed for them, professional advice and outstanding service.

Rocksolid service

Our service; we are very proud of that! Whether it is clear purchasing advice, a machine installation, regular maintenance or help with a breakdown. We are all ready to provide you with advice, assistance and service. All our technicians are experienced, knowledgeable and VCA certified. In addition, you can often solve a minor fault or carry out maintenance yourself with the help of our service.

Strong in automating

We have already been active for over 30 years in industrial automation, specialising in the fields of machine control, machine automation and process automation. We have helped many clients with their packaging problems. Are you curious how? Go to our website www.cyklop.com

WRAPPING

Palletwrappers

Cyklop offers different types of pallet wrappers: the turntable wrapper, arm wrapper, ring wrapper, robot wrapper and the horizontal wrapper. Each type of stretch wrapper has its own specific characteristics.

Which type is most suitable for you depends, amongst other things, on what is being packaged, what the dimensions are, the amount of pallets per day and how heavy the load is. Click on the website for more information about that productgroup.

Custom advice

With our products and expertise, we offer you the best solution in the field of cargo securing during internal and external transport, with the focus on the safe and undamaged transport of products. We will work with you to review your packaging process and determine what is the best solution for you. We are happy to advise you on the best and most cost-efficient solution!

Please feel free to contact us via info@cyklop.de or call +49 2236 - 602 0

TAPING

Tape machines

Packaging tape can be applied manually, with a table dispenser or with a tape machine. A hand-dispenser is often used for manually applying tape. Cyklop also offers a wide range of products besides handtools, such as table dispensers, semi-automatic, automatic and fully automatic tape machines. The choice for type of machine depends on the amount of boxes that need to be closed.

For more information about the product group, click on the website www.cyklop.com

We are here to help!

A lot of information can come your way when choosing a taper. We are happy to help you make this choice. With our expertise, wide range of products and experience we can provide you with tailor-made advice.

Feel free to contact us via info@cyklop.de or call +49 2236 - 602 0

STRAPPING

Strapping tools and machines

Machines and equipment for strapping from small quantities to automated strapping machines, we have it all. Small quantities can easily be strapped with our handheld, battery and pneumatic strapping tools. In addition to the strapping machines, there are also semi-automatic, automatic and fully automatic strapping machines. The fully automatic machines can be integrated into a packaging line. We offer machines and equipment for strapping with both steel strap and PET / PP strap.

For more information about the product group, click on website www.cyklop.com

Start saving today!

At first glance, purchasing a strapping tool or machine only seems to entail costs. However, the purchase is an investment. In the long term, you save costs and you work faster, so you can strap more products in the same amount of time. Ultimately, the investment mainly yields benefits!

Would you like to know the benefits of switching to a strapping machine or device? Contact us via info@cyklop.de or call +49 2236 - 602 0

CODING

Industrial inkjet printers

Cyklop offers various solutions for coding products and packaging. Our printers can be divided into two categories: the High Resolution Inkjet Printer (TIJ) and the Continuous Inkjet (CIJ).

A high resolution inkjet printer is ideal when high print quality and ease of use are required. High resolution inkjet printers use easy-to-change standard cartridges and do not use additional solvents. A continuous inkjet printer uses ink and make-up liquid (thinner). Both liquids are in a separate container / bottle and are mixed in the ink reservoir to achieve the correct thickness. The ink is brought under pressure from the ink reservoir through the print hose into the print head and then ejected onto the surface to be printed.

For more information about the product group, click on the website www.cyklop.com

Which way of coding is best?

Choosing the right type of printer is not always easy. Various factors such as the shape, printing environment, speed, type of surface, what to print and the conditions to which the print is exposed play a role in making the right choice. In addition, different types of ink and cleaning agent are used. This factor is also important in making the right choice.

We would of course like to help you with this! Please feel free to contact us for tailor-made advice info@cyklop.de or +49 2236 - 602 0

BUNDLING

Elastic binders

The term bundling is used to hold products together by means of elastic or a Strepper®. The machines that do this are called elastic binders and Elastobinders. Over the years, we have developed proven techniques, making our machines extremely reliable and stable in extreme conditions. Almost all our binders are available in different designs and can be provided with various options.

For more information about the product group, click on website www.cyklop.de

Production in Europe

All elastic binders and Elastobinders are developed and produced in the Netherlands. The Strepper® is also produced there. Thanks to this in-house production, we can switch quickly, deliver tailor-made products and continue to improve. In addition, all binders can be built in transport lines, which makes the bundling process automated.

Would you like to know whether our elastic binders are suitable for your product? Please feel free to contact us via info@cyklop.de or call us +49 2236 - 602 0
