Our Products

Eco Coco Jiffy®

28mm, 30mm, 36mm, 38mm, 42mm

Eco Coco Round Disk

50mm, 60mm, 85mm, 100mm, 120mm

Eco Coco Brick

200mm x 100mm x 60mm

Eco Coco Black

30cm x 30cm

Eco Neem Disk

120mm x 120mm

Eco Coco Grow Bags

30 cm x 30 cm

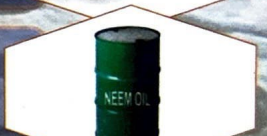

Eco Coir Log

3meter x 30cm

Eco Neem Oil

210 Ltrs

Eco Neem Cake

2Kg, 10Kg

Eco Neem Pellets

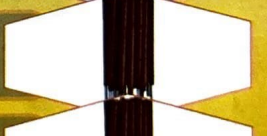

2Kg, 10Kg

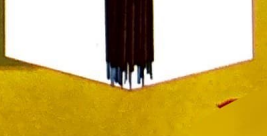

Coir Pole in 2 Ft

Coir Pole in 3 Ft

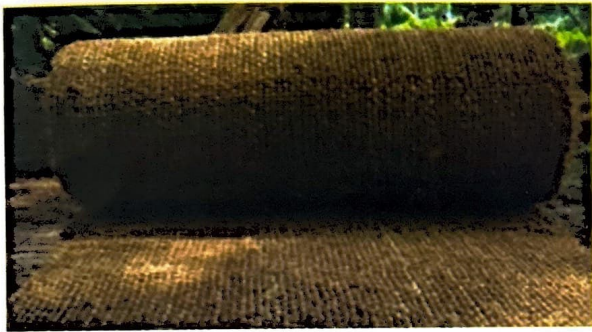

Coir Pole in 4 Ft

Coir Logs, GeoTextiles, Coir Mats Also Available...

Working with nature

Coir Geotextiles Protect land surface and promote quick vegetation. Geotextiles are a wonderful treasure of natural eco friendly, erosion control blankets in woven and non-woven preparations. Totally biodegradable, geotextiles help soil stabilisation and renew vegetation in varying slopes.

Features of Coco Geo Textiles

Natural Fiber, Bio-Degradable and Environmentally friendly.

Coir is the Ideal choice for a Geo-textiles material with 20% Retention Strength even after one year.

High tensile strength (absorbing or attracting moisture from the air).

Can dissipate the energy of following water and absorb the excess solar radiation.

can be successfully utilized in controlling even the steepest of slopes from erosion.

Can absorb water. allowing re-vegetation in low rain areas.

Adds organic material to soil/ Follows the contour of the soil surface. Has Hygroscopic properties and promotes vegetative growth.

High tear-strength resistance.

Coco Coir Logs are a biodegradable erosion control product for hills/ banks/ shorelines, and other erosion prone areas. These coir fiber logs create a natural control area that helps establish growth and control erosion. Coco Coir Logs have been effectively used for erosion control in restoration projects, stabilization areas, and construction job sites. Standard design of the coir log features strong biodegradable erosion control materials of outer coir twine netting that surrounds a mixture of mattress coconut coir.

Features of Coir Logs

Easy to Install

Provides Nutrients to Surrounding Areas

Allows for Deep Rooting of Plants

Helps Build into Existing Contours

Requires no Chemical Treatment

High Air and Water Permeability

Environmentally Friendly

Safe for Surrounding Wildlife

Biodegrades over 2-5 years

Effectively Holds Seeds and Saplings in Place

ECO COCO Jiffy[®]

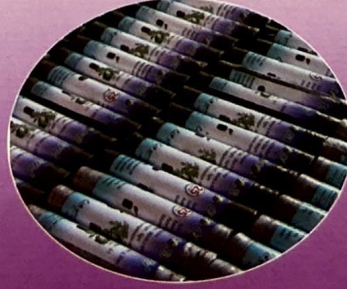

The Versatile and rapid seed starting ECO COCO Jiffy[®]

Our ECO COCO Jiffy[®] Pellets are excellent alternate to peat pellets for growing vegetables or flower seeds.

ECO COCO Jiffy[®] is Cost effective for Greenhouse growers and Hydroponic application.

ECO COCO Jiffy[®] are 100% organic growing medium and eco friendly, made from regrowable COCO granulates.
