-ABOUT US-

Fidan Botanic Garden, which has been serving for more than 30 years with Türkiye's deep-rooted experience in the field of landscaping and plant cultivation, offers innovative solutions with the mission of preserving the beauty of nature.

We develop diverse range of projects from plant production to landscape design, from application to maintenance services, and we work based on environmentally friendly principles with our expert team.

Our company, which researches the entire world's flora and constantly develops new varieties, introduces thousands of new plants that are beneficial to nature against waste and harmful gases, with the slogan "A Greener World".

PRODUCTS & SERVICES
Our company focuses only on leafy plant production and includes many special species, especially Acer Rubrum, in its production portfolio.

With our expert team, we offer a wide range of services from plant production to landscape project design and implementation, from city parks to residential and commercial landscaping projects.

"In addition, our company is preferred in modern and sustainable green space designs with its patented hanging garden products, as well as horizontal and vertical garden concepts."
