

GREENLINE COCOPEAT

GROWING FUTURE

About Us

Greenline Cocopeat is the leading company in the coir-cocopeat substrate market for Hydroponics growers and nurseries. Coir-Cocopeat is used world wide as a growing media for various hydroponics crops, nurseries, plant propagation and bedding plants both in its pure form as well as in the many specialized mixtures suited for different growing regimes.

Why Greenline?

Driven by innovation and product development we have built an excellent reputation for reliable quality and deliveries. Our support starts early stage and before we agree an order we help our customers to decide for the best coir product for their purpose. Our main products are Growbags, 5 kg Blocks and Briquettes

Social Responsibility

Greenline Cocopeat actively practices corporate social responsibility by paying fair wages as determined by the labour laws in the countries in which we operate. We also ensure a safe workplace, prohibit the use of child labour and strive to take care of the environment.

greenline GROWBAGS

Greenline Cocopeat growbags have become a popular choice for multipurpose growing medium for vegetables, fruits & flowers. Our growbags are 100% natural. Growbags are made up of a special blend of coir pith and chips, designed to provide the ideal air to water ratio for hydroponics. Our strict quality control regime ensures that only the best coir products reach our customers.

Research and practical experience show significant advantages when using the Greenline Cocopeat growbag: rapid initial growth after planting, a nice horizontal rooting through the entire growbag, smooth and uniform drainage. Growbags are packed in high density, co-extruded plastic bags, which are UV treated at least a minimum of 2 years. Another advantage is that they are easy to transport before re-hydration and can be stocked for months as they are compressed dry. After growing the cocopeat is useful to turn to other crops or to soil improvement. Investigation of Plant Research in Mado (Netherlands) shows significant advantages when using cocopeat Growbag.

grow ur future in an
ORGANIC WAY

ADVANTAGES

greenline GROWBAGS

- Rapid horizontal rooting
- Perfect drainage through the coarse coconut chips on the bottom
- Less root diseases by less wet roots
- At least the same or sometimes even better yield as compared to rockwool
- 20% less water consumption compared to rockwool
- Saves fertilizers

lower production costs

With a number to 17,000 (compressed), coir mats in a 40ft container, its transport is very efficient and durable.

Our Growbags can be custom made as per the requirement of the customer. We make unwashed, washed, buffered growbags with adequate mixture of coco-chips ranging from 30% to 100% coco-chips growbag depending on the needs. The increase in the percentage of chips means increase in air water ratio.

We provide the following sizes in different compositions of coco chips.

COMPRESSED SIZE (L x W x H) CM	WEIGHT (IN KG)	LOADABILITY - 40' QTY / PALLET
100 x 15 x 10	1.80	500
100 x 15 x 12	2.10	430
100 x 15 x 15	2.60	410
100 x 18 x 10	2.20	410
100 x 18 x 16	3.20	310
100 x 20 x 10	2.70	360
100 x 20 x 12	2.80	350
100 x 20 x 16	3.60	280
100 x 20 x 18	4.00	250
95 x 20 x 12	2.60	350

These compositions are available in washed, unwashed & buffered growbags.

cocopeat BLOCKS

We also blend the **COCOPEAT BLOCKS** with coco chips as per the requirement of the customer.

TEXTURE
100% COIR PITH

We can supply coco peat, coco fibres and coco chips in the form of compressed 5kg or 25kg blocks consisting of 100% coco peat, fibres or chips. Washed, buffered or unwashed. Even if you want a mixture made to order, you can choose to receive it in the form of a compressed block.

Hydrate the blocks slowly by using 25 liters of water and allow the moisture to be fully absorbed. Once the block is completely reconstituted to get the yield 70 – 75 liters. Now you are ready to use it to improve your potting soils or use as a 100% soil less growing medium. A perfect growing media for flower and vegetables cultivation as well for soil conditioning.

5 kg
COCOPEAT BLOCK

QUALITY	COMPRESSED SIZE (L x W x H) CM	EXPANDED VOL (LITRES)
NATURAL	30 x 30 x12-15	60 - 65
WASHED	30 x 30 x12-15	70 - 75
BUFFERED	30 x 30 x12-15	70 - 75

LOADABILITY **Palletized:** 24 Ton with pallet

cocopeat BRIQUETTES 650g

Our cocopeat briquettes are used in variety of home gardening, kitchen gardens and to a lot of domestic gardens. We blend our briquettes with coco chips as per the requirement.

TEXTURE
100% COIR PITH

LOADABILITY
Palletized:
25 Ton with pallet

QUALITY	COMPRESSED SIZE (L x W x H) CM	EXPANDED VOL (LITRES)
NATURAL	20 x 10 x5	8
WASHED	20 x 10 x5	9 - 10
BUFFERED	20 x 10 x5	9 - 10

BAGGED SUBTRATE for resellers

Greenline's 50L Bagged Substrates are available in customized formulations for hydroponics, seedling and potting mixes. For resellers we also offer customized labeling opportunities for your brand.

Greenline Hydroponic Coir Substrate delivers a full 50 litres of washed premium quality coir in a recyclable, strong, compact smart-bag. Our product is 100% organic, free from chemical additives and soil disease. Its uniform structure provides consistent, high-performance results that you can count on. Greenline's superior performance and reliability have made it the preferred medium worldwide for commercial, hydroponic crop production. The compact smart-bag has a smaller carbon footprint by lowering fuel and transportation costs per unit.

- Better for the environment - Lower cost to you.

cocopeat DISCS

Our cocopeat discs are used for special application.
The application of the discs varies according to the size.
