ABOUT US

// For over 70 years Idromeccanica Lucchini has been designing and manufacturing covered greenhouses in plastic material for horticulture and floriculture.

Paying extra attention to the needs of each customer, Idromeccanica Lucchini has developed, over time, a vast selection of products to satisfy every cultivation need, offering evergreen traditional and new technologies.

Each Idromeccanica Lucchini greenhouse is conceived and developed around the plant and its health, respecting the environment, minimizing the environmental impact.

'TURNKEY' GREENHOUSE BUILDERS

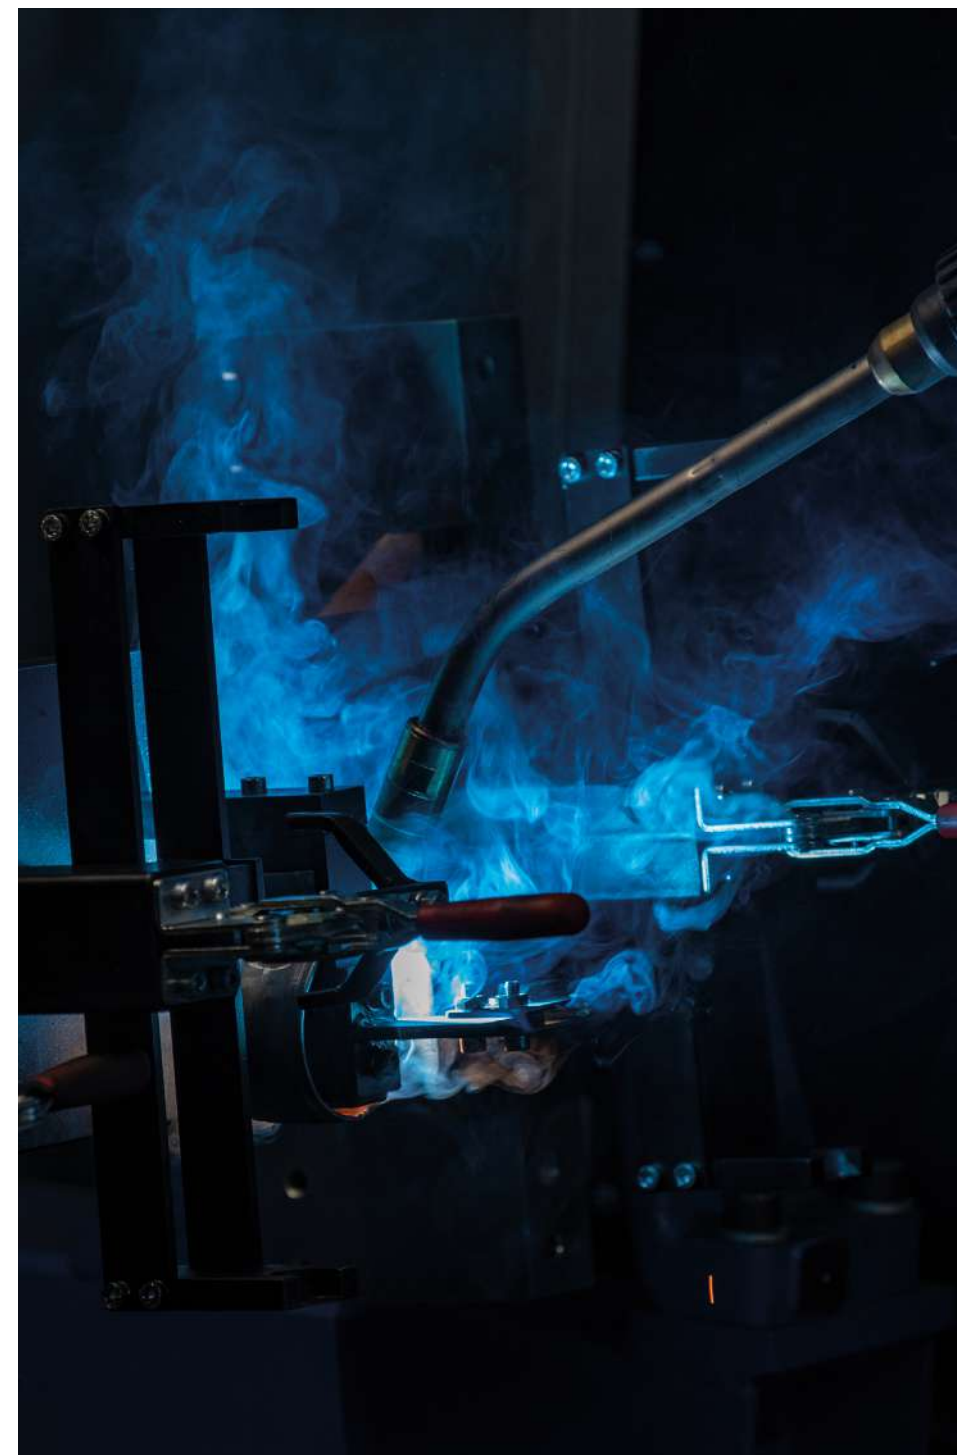

BY YOUR SIDE EVERY STEP OF THE WAY

Customization.

Every greenhouse designed and built by Idromeccanica Lucchini is based on two fundamental concepts: the **customer's needs** and the **plant's health**.

There are no standard jobs and the exact same solution will never be presented to two different clients. The climatic conditions, the characteristics of the individual crops, the production needs are variables that deeply affect the choice of materials, technologies and the type of installation. Idromeccanica Lucchini scrupulously scrutinize the **quality and quantity of light** to be administered to the plant, the most suitable tools for feeding and irrigation, mechanical or **automatic climate management** as well as a detailed **tailored solution**. The company's **international experience** has further expanded its horizons, overcoming a variety of different problems and welcoming new challenges each time.

After all, the services of Idromeccanica Lucchini are not limited to the design and construction of greenhouses or other tools offered by the wide range of products, but stretch out even after installation with a **technical** and **agronomic consultancy** service that allows each customer to maximize the production, optimize the resources of the various greenhouse plants, and if necessary and required, get the support linked to logistics and sales channels.

+70 YEARS

THE LEADING MANUFACTURER OF GREENHOUSES AND TECHNOLOGICAL SYSTEMS IN ITALY

Tradition.

Founded in **1947** and based in Guidizzolo (MN) in the heart of the Po Valley, for millennia a territory with an agricultural vocation, Idromeccanica Lucchini **today works and exports all over the world** thanks to experience, tradition and strong vocation for innovation, research and development.

The commitment over the years has allowed the company to become a cutting-edge leader in the production of covered greenhouses in plastic material.

The experience gained from the **collaboration** and constant listening to customers has made it possible for Idromeccanica

Lucchini to develop products measured on the real needs of the agricultural, horticultural and floricultural sector with professionalism and developing a strong listening ability, hence the company's success. A scrupulous **product control**, the use of **100% made in Italy** materials and a pioneer production department, has allowed Idromeccanica Lucchini to evolve over the years.

From the passion and commitment of the Lucchini brothers, the company team has expanded and has been enriched with important personalities both technical- and scientific-wise. Designers, agronomists, consultants and salespeople make the greatest resource of Idromeccanica Lucchini, sharing expertise and passion in one important enterprise.

YOUR BEST CHOICE

AND PROVIDE THE BEST PRODUCTS

Innovation.

The unceasing search for new solutions in nurturing vegetables and flowers stems from the desire to push ourselves further and further. Idromeccanica Lucchini, in addition to constantly collaborating with customers, has long since initiated **synergistic actions** with universities and academic centers in order to be a step ahead and provide the best possible products. This desire stems from an **innovative marketing concept which embodies** the idea that the company does not have to be proposing itself to the market, but turning the market to want to choose Idromeccanica Lucchini.

The many testimonies of many satisfied customers, as well as the systems made by Idromeccanica Lucchini are, in fact, the best testimonials for the public to choose, among the many, what Lucchini has to offer. Precisely for this reason, the company put in place an expansion plan and the inauguration of the **Green House Park**: a real large **exhibition and research space**, where customers can assess and touch the great progress and the high technological level all though Idromeccanica Lucchini.

Lucchini products are all scrupulously checked by the **quality control** office, the materials are 100% made in Italy. Idromeccanica Lucchini has been certified ISO 9001: 2015 and UNI EN 1090-1: 2012.

By emailing info@lucchiniidromeccanica.it the Quality Policy may be requested, where Idromeccanica Lucchini SpA established for the full satisfaction of customer expectations and in compliance with regulations.

TECHNOLOGICAL SOLUTIONS

FAR-FLUNG INSTALLATIONS

Internationalization.

From the most traditional greenhouses to the latest vertical farming technologies, Idromeccanica Lucchini is able to offer **different solutions for every need**. Strong logistical capabilities have enabled the company to operate well beyond the territory and develop projects and installations all over the world, even in the most adverse environments for environmental and climatic conditions. With a plant-oriented greenhouse-building concept, Idromeccanica Lucchini offers **cutting-edge solutions** thanks to **prestigious collaborations** with the scientific world. The production department is

equipped with latest generation systems and machines that allow **unceasing production, made safe** by quality control. Greenhouses and plants are shipped and assembled worldwide.

On the qui vive for **environmental issues**, the company offers solutions devoted to the maximization of horticultural production both numerically and qualitatively, saving water and energy, thus reducing soil waste. Hydroponics, as well as vertical farming, represent the new frontier for crops with **low environmental impact**, minimum waste of soil and careful management of water consumption. Thanks to its strong organizational skills, Idromeccanica Lucchini has developed projects in various geographical areas such as: United States, Scandinavia, Russia, Indochina, South America, The stans, West Africa, Eastern Europe and many other territories counting over 40 countries.

WHEREVER YOU ARE, WE ARE THERE

We produce greenhouse, screening system, benches, irrigation, equipments around the world

PRODUCTS AND SERVICES

DESIGNED, MANUFACTURED, INSTALLED

Idromeccanica Lucchini **designs, manufactures, installs** and sells professional and photovoltaic greenhouses, hobby and garden greenhouses, agricultural tunnels, supplies accessories for greenhouses, greenhouse covers for mulching, aluminum profiles, aluminum pallets for plants and flowers, automatic opening systems, automatism for greenhouses.

It also offers **consultancy services** in the development of business plans, **agronomic support**, plant layout and logistics study, training of specialized personnel, plant assembly and maintenance.

FUTURE OBJECTIVES

LOOKING FORWARD

Idromeccanica Lucchini boasts **60 direct operators** and **over 200 employees** including collaborators and external partners as a supply chain. The great experience gained abroad has made it possible to gather about thirty international partners including distributors and integrators. Thanks to these important resources, the company plans to get going along the path of technological innovation, product diversification and potential markets, both Italian and foreign.

Over the next 10 years Idromeccanica Lucchini will finance and implement new spin-offs and industrial plans with a particular focus on low environmental impact and even more focus on the plant's health. Technicians, engineers and agronomists will in fact design the future plant-oriented Lucchini greenhouses **as the real focal point of the entire program.**

REVIEWS

SATISFIED CUSTOMERS

Idromeccanica Lucchini takes pride in the testimony of **satisfied customers**.

Year after year, installation after installation, consolidated customers over time, as well as those who use a Lucchini greenhouse for the first time, leave positive feedback on the work and services received. Here are some direct statements.

ISI Sementi

“We did this project together with Idromeccanica Lucchini, because we strongly believe in teaming up with Italian companies. We are in Parma, the so-called 'food valley', and we love to take our work around the world together with other companies, promoters of technology, quality and excellence of the Made in Italy such as Idromeccanica Lucchini”.

Armenia case

“With Idromeccanica Lucchini we built a greenhouse in Armenia, at 1800 meters AMSL, weathering a strong temperature range and insolation. Thanks to the agronomic consultancy of Idromeccanica Lucchini, after two seasons we have achieved results that are far beyond expectations and superior to greenhouses of the same level as European competitors. For the first time in the Caucasus region, tomatoes were produced in hydroponics with no artificial light. The secret of this success is teamwork.”

REVIEWS

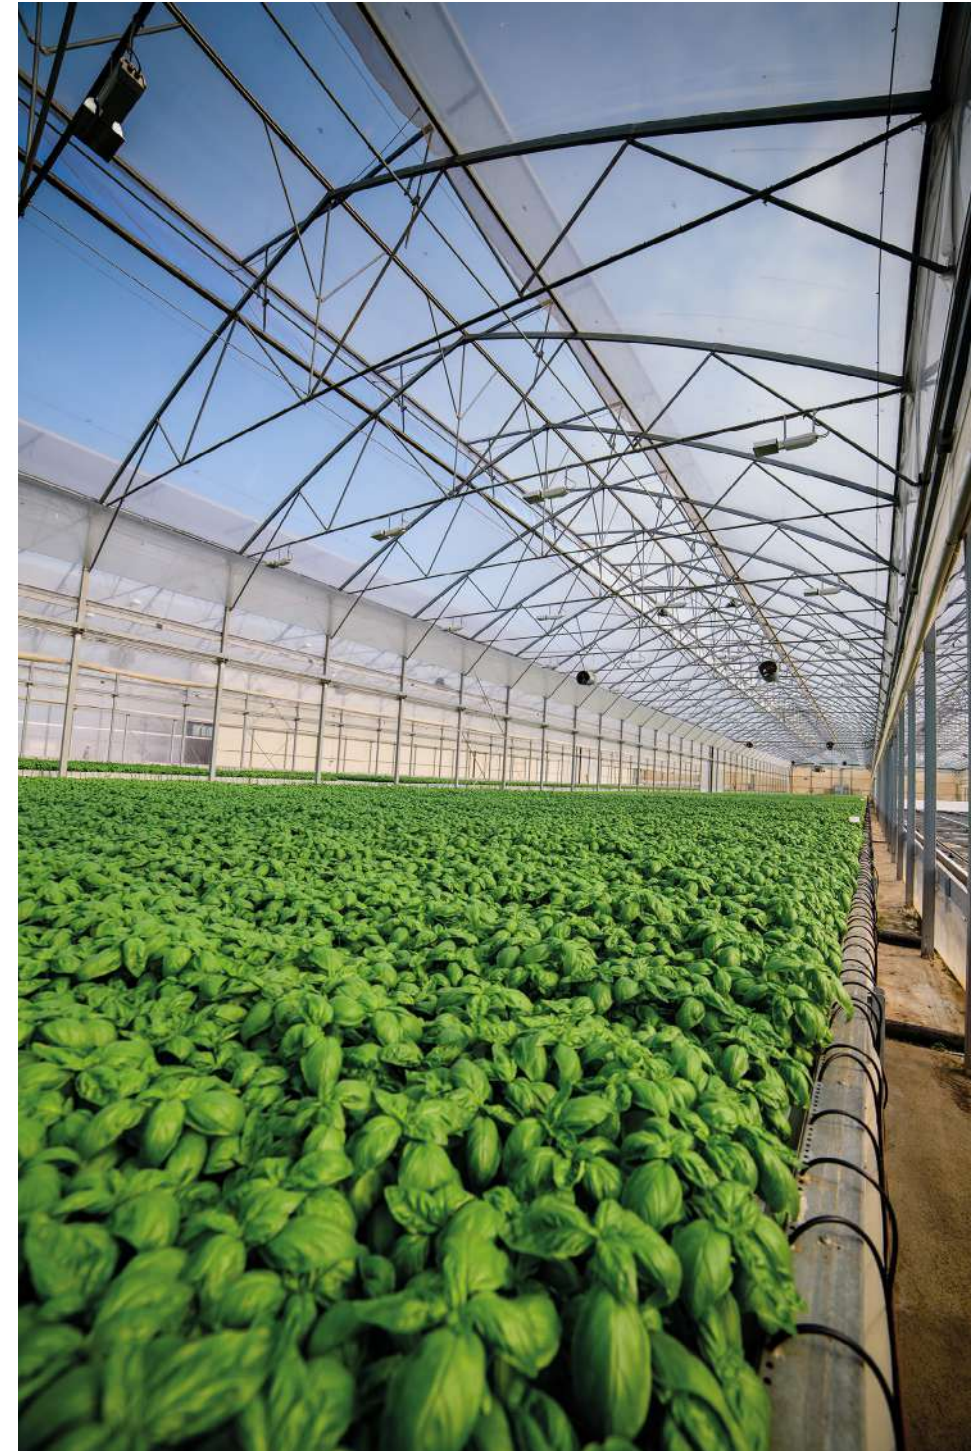

SATISFIED CUSTOMERS

Sempre fresco

"We chose Idromeccanica Lucchini for the construction of a highly technological greenhouse. The support we got from the technicians was fundamental to create a perfect microclimate inside the structure."

Sonzogni Group

"For the production of IV range vegetables we have chosen Idromeccanica Lucchini for the punctuality of the service, the quality of the structures, and the impeccable assistance."

Our greenhouses: perfect ecosystems for your growth
