About us

Teraplast is a solid reality in pots panorama, which has been present for years all over the world to enrich with green public spaces, premises and private homes.

In our company tradition and innovation are united by an indissoluble bond. Our experience in plastic moulding, combined with our desire to improve our products and user experience through training, analysis and constant research, allow us to identify **new trends** and respond to **emerging needs**.

The company's innovative capacity is based on continuous experimentation with product design and finishing, in order to offer customers an increasingly wide range of **high quality** products, which are particularly recognisable for their strong **stylistic imprint**, high research content and **aesthetic value**.

Thanks to its products, Teraplast goes on with the tradition of excellence that for a long time has been linked to the **Made in Italy** mark, succeeding in conjugating the functionality of the pot and the aesthetic dimension.

GLOBAL PRESENCE

From our headquarter in Italy, **we ship our products around the world every day**. We are a global partner which **exports to the main countries**: EUROPE, USA, CANADA, OCEANIA.

Excellence and tradition **Made in Italy**

What we believe

A NEW LINE OF POTS MADE FROM 100% MATERIALS OBTAINED FROM THE COLLECTION AND RECYCLING OF POST-CONSUMER WASTE.

The company offers **a new range of products made of 100% materials obtained from the collection and the recycling of post-consumer waste.**

Plastic is too precious to be thrown away, the tera® line, **certified by the Institute for the Promotion of Recycled Plastic (IPPR) “Plastic Second Life”**, follows a process of circular economy in which plastic, at the end of its life cycle, can be recycled and reinserted into the production system.

IPPR certification is obtained using materials from certified collection centres and guarantees the entire production chain.

An eco-sustainable way of looking to the future: a line of non-toxic, recycled and 100% recyclable pots and decorative pebbles.

The eco-friendly products are made by using sustainable plastic that reduces their environmental impacts and cuts carbon dioxide emissions.

tera®

tera[®] circular economy

**100% made
from waste**

**100% recycled
and recyclable**

Sustainable process

**we want to give plastic a new life,
making it an ever-reusable resource.**

Plastic is a 100% recyclable material, so in energy terms it is one of our most efficient resources.

Teraplast has always been an environmentally conscious company and it believes in the **circular economy**: a regenerative system that reduces waste and emissions through **recycling**, reuse, maintenance and repair. A plastic product at the end of its life cycle can be recycled and reinserted into the production system, in order to create a recycled **product of the same quality** as the original one.

ALTÈRA

design made for you

From the study of everyday spaces comes the need of Teraplast S.p.A. to introduce a new line of furniture items to integrate complements in perfect balance with the environments, without relegating them to a marginal role.

The choice of shapes, colors and textures aims to demonstrate the versatility of products in different contexts, in order to enhance the space around us.

The experience of a solid company combined with the passion for innovation, the research for original and functional design, the curiosity for new possibilities and the interest in proposing diversified solutions, guided by superior aesthetics, have given birth to Altèra.

Partnership

DESIGN
AND TECHNOLOGY

Teraplast is oriented towards experimentation and research beyond the limits of materials, technologies and shapes, in order to create innovative and effective **products** and **display solutions**.

The production of a wide range of articles together with the design of display models allows us to assist the customer in a complete way with the aim of improving performance within the point of sale.

We offer **display solutions** and **communication tools** designed to provide consumers with all the information they need to choose a product. A service aimed at enhancing and enriching the collaboration with our partners through constant dialogue and research.

Environmental Sustainability

SUSTAINABILITY REPORT

Teraplast is working on drawing up its first Sustainability Report in order to respond to new market challenges in a strategic manner and with emphasis on values.

Through a process of reporting and stakeholder engagement, the Sustainability Report transparently communicates the positive and negative impacts considering economic, social and environmental sustainability.

The methodology used is that of the GRI (Global Reporting Initiative)

Environmental Sustainability

WHITE CERTIFICATES

Through **interventions of efficiency** of the machinery and plants, we have obtained the **Energy Efficiency Certificates (TEE)** certifying the achievement of energy savings.

39% of **energy self-produced** through our **photovoltaic system**

70% of the **electricity consumed** comes from **renewable sources**

Certifications

PLASTIC
SECOND LIFE

The tera® Line of Teraplast, is certified by the brand “**PLASTIC SECOND LIFE**”.

This certification comes from the necessity to make more visible and easily identifiable the plastic goods for recycling that are intended for public administrations and / or companies with a majority of public capital, as well as for retail (large-scale retail).

For this reason, every year IPPR publishes the Directory of branded materials and products “Plastic Second Life”.

- The brand “ Plastic Second Life“ **is a system of environmental product certification** dedicated to materials and products obtained from the recycling of plastic waste;
- It is the **first Italian and European brand** dedicated to recycled plastic;
- Introduces the concept of “**quality**” in recycled plastics;
- Introduces the concept of “**traceability**” of recycled materials.

Certifications

ISO 9001 CERTIFICATION

Teraplast has obtained the **ISO 9001 certificate**.

ISO 9001 is the international standard for a quality management system ("QMS"). In order to be certified to the ISO 9001 standard, a company must follow the requirements set forth in the ISO 9001 Standard.

The standard is used by organizations to demonstrate their ability to consistently provide products and services that meet customer and regulatory requirements and to demonstrate continuous improvement.

ISO 9001 certification enables:

- more control of costs reducing waste
- increasing productivity and effectiveness of internal processes, with the consequent reduction of inefficiencies.
- Increasing the ability to meet the needs and expectations of its customers through better knowledge and control of the company.

Design, technology and education

EDUCATION

Teraplast believes in training and invests every year to ensure the professional growth of its employees. The company also promotes **training courses dedicated to Garden Centres** with the aim of supporting the staff in the training area, delving into the topics of merchandising, promotions, assortment design and garden design.

AWARDS

The Tera project was selected by **ADI Design** and was among the finalists for the **Compasso d'Oro Award**: the world's oldest and most authoritative design award.
