BEAUTIFUL BLOOMS

Today's Innovation

TURFquick® is a biodegradable mat. It is pre-sown with seed and fertilizer, enabling vegetation to be restored easily and prevent further erosion of the underlying landscape.

Made from cellulose fibers that biodegrade over a period of 8-12 weeks, TURFquick® is a natural product and does not leave any synthetic residue. It has a tight internal structure that ensures that seeds and fertilizer are secured evenly and are not disturbed during handling, transportation, and installation.

Plant a lawn, flowers or other plants simple, economical and environmentally friendly with Turfquicks patented, innovative and 100% biodegradable components.

For the coming season, you can also get acquainted with both greener and more colorful products:

The enviromental solution

Thicker, lusher, healthier and more beautiful. If those words describe your lawn goals, success may be closer than you think. Transforming thin, lackluster grass into a thicker, healthier lawn isn't difficult to achieve. With our **All-in-one** grass growing technology you can get a thicker lawn and put thin grass behind you. Roll out grass seeds mixtures, and you'll enjoy a lawn that looks and feels great for years to come.

Add color to the garden

With our new flower mixes, it becomes easy to add color to the garden. If you are interested in a richer insect life in the garden, our Butterfly mixture will be a good choice. If you are looking for colorful flowers for your cooking, Edible Flowers is the perfect mix. You can also roll out your new flower meadow - it doesn't get any easier. Read much more about the different flower mixes on page 6.

LUSH & GREEN - QUICK

WE ARE " THE ROOT TO YOUR SUCCESS "

TURFquick is committed to providing quality products to our customers and we aim to deliver solutions that surpass our customers' needs. We offer an extensive variety of landscaping and turf seeds which allows us to service the needs of several growing markets. We also offer custom blending to accommodate your individual requirements. Our relationships with producers and suppliers around the world enable us to provide products that are increasingly higher in demand.

- * Simply roll, water and watch it grow!
- * Bio textile prevents seeds from washing away
- * Priced right, easier, and lighter than traditional sod
- * Bio textile holds 6x time its weight in water
- * Perfect for sun, shade and slopes

Best recommended mixture to use = 

Accelerator

With accelerator you get a good-looking lawn fast. Accelerator enhances seed germination rate and gives you 38% more grass plants in 7 days. With accelerator, you do not only get a lawn fast, but it's also thicker, has less weeds and has richer green. Accelerator seed is just as safe for children and pets as normal seed.

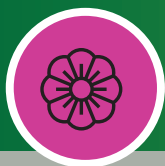

Quick Action®

Quick Action® is enhanced grass that provides fast and strong establishment at soil temperatures as low as 3° C. It has extra wear and drought tolerance and increased disease resistance. Quick Action® is only available from DLF.

SeedBooster®

The super-efficient seed coating, SeedBooster®, feeds the seed, not the weed - it is the number one fertilizer for fast establishment. The coating increases the weight of each seed and gives a better seed-to-soil contact and makes sowing easier. SeedBooster® is only available from DLF.

BEAUTIFUL AND COLORFUL FLOWERS

AN ENVIROMENTAL APPROACH TO LAND CONSERVATION

- Erosion control and soil & water stabilization.
- Beautification and enhancement of landscapes.
- Biodiversity and wildlife habitat enhancement & restoration.
- Pollinator habitat for honeybees and native pollinators.

FIELDS FLOWERS

High impact annuals wildflowers mixture

CREATE BEAUTIFUL LANDSCAPES

FILEDS FLOWERS is a low-growing seasonal annuals wildflower seed mixture, designed to create a robust and attractive display in areas where final growing height is of paramount importance. This is particularly relevant when sowing near visibility splays and sight lines on road junctions. This 100% dwarf flower mixture will provide rich blooms throughout the season, perfect for enhancing any street scene. Quick to establish with a long flowering period from 8 weeks after sowing up until the first frosts.

Variety list

Sweet Alyssum, Dwarf Morning Glory, Cornflower, California Poppy, Farewell to Spring, Virginia Stocks, Flax, Love-in-a-Mist, Mexican Marigold, China Aster, Pot Marigold, Candyturf.

WILDFLOWERS

Designed for ornamental landscaping

PERENNIAL WITH 28 WILD DANISH FLOWERS

WILDFLOWERS The interest in establishing flowering fields comprised of wildflowers and flowering herbs has grown in recent years. It is important to understand that a flowering field will not usually grow well on its own accord. It requires careful cultivation. If the proper steps are taken establishing a flowering field and certain maintenance is done, a wildflower field will truly blossom.

Variety list

Yarrow, Corn Cockle, Golden Chamomile, Bluebell, Nettle-Leaved Bellflower, Corn Flower, Brown knapweed, Chicory, Vipers Gloss, Dropwort, Lady's Bedstraw, Field Scabious, Oxeye daisy, Birdsfoot, Clammy Campion, Woodland Forget-me-not, Wild Marjoram, Corn Poppy, Hoary Plantain, Cowslip, Self heal or Heal-all, St. John's wort, Red Campion, Ragged Robin, Musk Mallow, Nottingham Catchfly, Bladder Campion.

BUTTERFLY & BUMBLEBEE

A lot of pollen and nectar

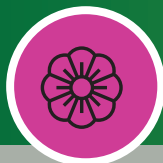

EXTRA FEED FOR BEES AND INSECTS

BUTTERFLY AND BUMBLEBEE Includes Butterfly Milkweed, essential for the development of Monarch Butterfly larva. This mix provides prolific pollen and nectar for honey bees, wild bees, and butterflies; early spring through late fall. Control existing vegetation before planting to reduce competition for flower seedlings. Broadcast or plant with a grass drill, the goal being shallow seed placement into a firm seedbed.

Variety list

Agrimony, red Campion, Phacelia, Field Pansy, Alsike Clover, Musk Mallow, White Campion, Goats Rue, Oxeye Daisy, Wild Carrot, Betony ribwort plantain.

ARUGULA

NON-GMO seeds

ANNUAL

Strong tasting spinach-like green common in Mediterranean markets. Popular in salads, or cooked and served like spinach. 40 days.

ARUGULA - *Eruca vesicaria sativa*
Ease of Germination: Easy
When to Sow: Spring/Late Summer/Early Fall

BASIL

NON-GMO seeds

ANNUAL

It is similar to Genovese basil but the scent and taste are sweeter and milder. Matures slightly later than standard Genovese basil and is slower to bolt.

Basil - *Ocimum basilicum*
Ease of Germination: Easy
When to Sow: Spring/Anytime

CABBAGE

NON-GMO seeds

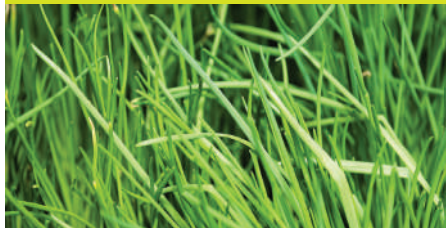

ANNUAL

Are useful for culinary purposes as well as ornamental. Freezing temperatures tenderize it bringing out its full flavour. Wonderful raw, in soups, stews, steamed or stir-fried, especially blended with fresh, chopped chives and coriander! 100 days.
Cabbage - *Brassica oleracea*
Ease of Germination: Easy
When to Sow: Spring

CHIVES

NON-GMO seeds

PERENNIAL

Regular onion chives. Besides using the leaves, try the pretty purple flowers, separated into florets, in salads for colour and flavour.

Chive - *Allium schoenoprasum*
Ease of Germination: Easy
When to Sow: Spring/Late Summer/Early Fall/Anytime

DILL

NON-GMO seeds

ANNUAL

Feathery leaves can be used to season salads, cooked meats, vegetables while seeds are used for pickling. Even better, dill is easy to grow and attracts helpful insects to the garden.

Dill - *Anethum graveolens* 'Mammoth'
Ease of Germination: Easy
When to Sow: Spring/Anytime

GARDEN CRESS

NON-GMO seeds

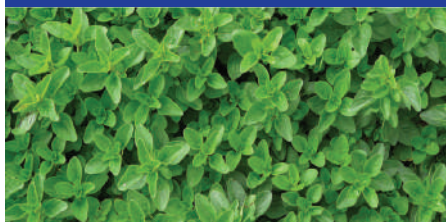

ANNUAL

Ruffled leaves with a peppery and refreshing flavor, and its lacy looking young foliage and seedlings are used in salads, stuffing or as a garnish.

Garden cress - *Lepidium sativum*
Ease of Germination: Easy
When to Sow: Spring/Anytime

OREGANO

NON-GMO seeds

PERENNIAL

This is the true oregano collected wild in the mountains of Greece. White flowers; very hardy. Excellent flavour.

Oregano - *Origanum vulgare hirtum*
Ease of Germination: Easy
When to Sow: Spring/Anytime

PARSELY

NON-GMO seeds

BIENNIAL

Regular onion chives. Besides using the leaves, try the pretty purple flowers, separated into florets, in salads for colour and flavour.

Parsely - *Allium schoenoprasum*
Ease of Germination: Easy
When to Sow: Spring/Late Summer/Early Fall/Anytime

PURSLANE

NON-GMO seeds

ANNUAL

Succulent leaves are popular in France for salads, cooked greens or in soups. Good summer green performing best in hot weather. Much improved over its wild relative. Leaves are a light golden colour.

Purslane - *Portulaca oleracea*
Ease of Germination: Easy
When to Sow: Spring

ORANGE THYME

NON-GMO seeds

PERENNIAL

Has a wonderful spicy orange aroma! Adds a zesty flare when used fresh or dried in soups, sauces, stews on roasts, fish and vegetables!

Orange Thyme - *Thymus fragrantissimus*
Ease of Germination: Easy
When to Sow: Spring/Late Summer/Early

PET GRASS

NON-GMO seeds

100 % ORGANIC CAT GRASS

Cat grass is a natural hairball remedy and provides ongoing hairball control as well as a digestive aid in cats and other animals. Chemical-free pet grass makes a healthy treat for cats, dogs, rabbits, guinea pigs, and reptiles....or you can juice them yourself for a wheatgrass shot.

LETUCCE MIXES

NON-GMO seeds

GROW YOUR OWN NUTRITIOUS VEGETABLES

TURFquick offers mixes of lettuces balanced for color, texture, flavor, and uniform maturity. Our lettuce mixes can be harvested at 3-6 weeks for use on their own in, or in combination with other salad mix ingredients. Our lettuce and greens mixes are also known as "mesclun mix" or "spring mix."

NEW DESIGN SINGULAR POUCH

CATCH-ALL DESIGN ECO FRIENDLY

HERBS

Grow your own veggies

Do you dream of harvesting your own home grown foods, but you don't know where to start? Growing vegetables isn't complicated.

Provides you with the following advantages:

- TURFQUICK-3D Armer can be laid down on terrains up to 50° to 70° of inclination
- It is suitable also for very steep scarps subjected to superficial detachment events up to 50° to 70° of inclination
- Easy and fast installation with no need of specialised labour work or special skills just roll it down and spick it on the ground.
- Erosion control and creating a green environment all in a single roll out with no need of further sowings before or after the laying procedure
- The plants can put down roots and grow uniformly and regularly true the 3D construction
- When filled with soil, the TURFQUICK-3D Armer guarantees perfect grass or flower covering also
- Unlike other monofilament like jute or coir matt products which are subjected to crushing, TURFQUICK-3D Armer maintains its effectiveness even after having being filled with soil
- It can be used on dry scarps or scarps composed of loose or friable soil
- Suitable for waterway banks with water flows up to 5 m/s
- Resistant to atmospheric agents and to rainwater flows

Pre-seeded Erosion control plantings textile

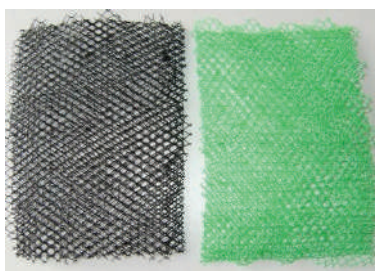

An enduring erosion control and a perfect slope vegetation are just two features of the TURFQUICK-3D Armer pre-seeded plantings textile with 3D TURFQUICK-3D Armer working together guarantee to control light erosion problems.

Plant an erosion control lawn easily and modernly!

In our own factory in Stockholm we manufacture high quality erosion control lawns from ecologically degradable cellulose which contains both erosion control mat and grass seed fertilizer.

The result is an even distribution of grass and manure, and that the cellulose cloth and 3D ARMER prevent grass seeds or soil from "floating" away during irrigation or rain.

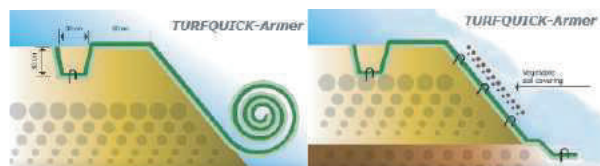

TURFquick 3D-ARMER lawns can also be planted vertically. The green cellulose breaks down as the grass grows and forms roots.

"Planting erosion control lawns has never been so easy"

Turfquick 3D-Armor Erosion E2 Seeds Mixture Composition

%	Species	Scientific name
