

**ATTALINK 3A ATTALINK 6A**

2 models to meet your needs.

Applies ties up to 60 mm in diameter.

Applies elastic ties.

2 types of ties: degradable or long-lasting depending on use.

■ Degradable ties made of natural rubber and cotton:

- The standard tie is recommended for most jobs. In agricultural applications, it falls off by itself when the plant no longer requires support and decays naturally in the soil.

- The thin tie is recommended for highly fragile applications (young herbaceous shoots...)

■ The natural rubber tie is girdled with synthetic fabric:

- The long-lasting version is more UV-resistant. It also provides a tighter grip.

**Tie colour choices:** off-white, green, black...  
To ease marking and blend into the environment...

**Technical features**

ATTALINK	3A	ATTALINK	6A
Max. binding Ø 30 mm		Max. binding Ø 60 mm	
Span: 44 mm		Span: 82 mm	
Loaded weight: approx. 520 g		Loaded weight: approx. 630 g	
Tie breaking strain: up to 3 kg			
Type of tie: elastic tie crimped with a small metal ring			
Tool is delivered ready-to-go
