

## POTS AND BASKETS YOU WON'T FIND ANYWHERE ELSE

**Van der Sar Import** is a manufacturer and importer of pots, baskets, vases, and bowls, with a strong focus on sustainability. We produce, among other things, items made from natural materials such as rattan, seagrass, and jute. In addition, we import ceramic pots, vases, and bowls.

Every day, we take steps on our journey toward becoming a 100% sustainable company. That is why we offer a wide range of pots and baskets with a low ecological footprint. Under our **Terima Kasih** and **CERA GOOD** brands, we market sustainably produced baskets and pots, with a focus on responsible use of materials and a conscious production chain.

Watch an episode about the sustainable origin of our rattan on Dutch television.
